User Manual: Desktop

The Intelligence Forge Lab: Paper Tracker

🌐 **Language:** English · বাংলা

This manual explains how to use the Paper Tracker on a **computer** (laptop or desktop) in a web browser such as Chrome, Edge or Firefox. Members should read sections 1–12. Admins should also read section 13.

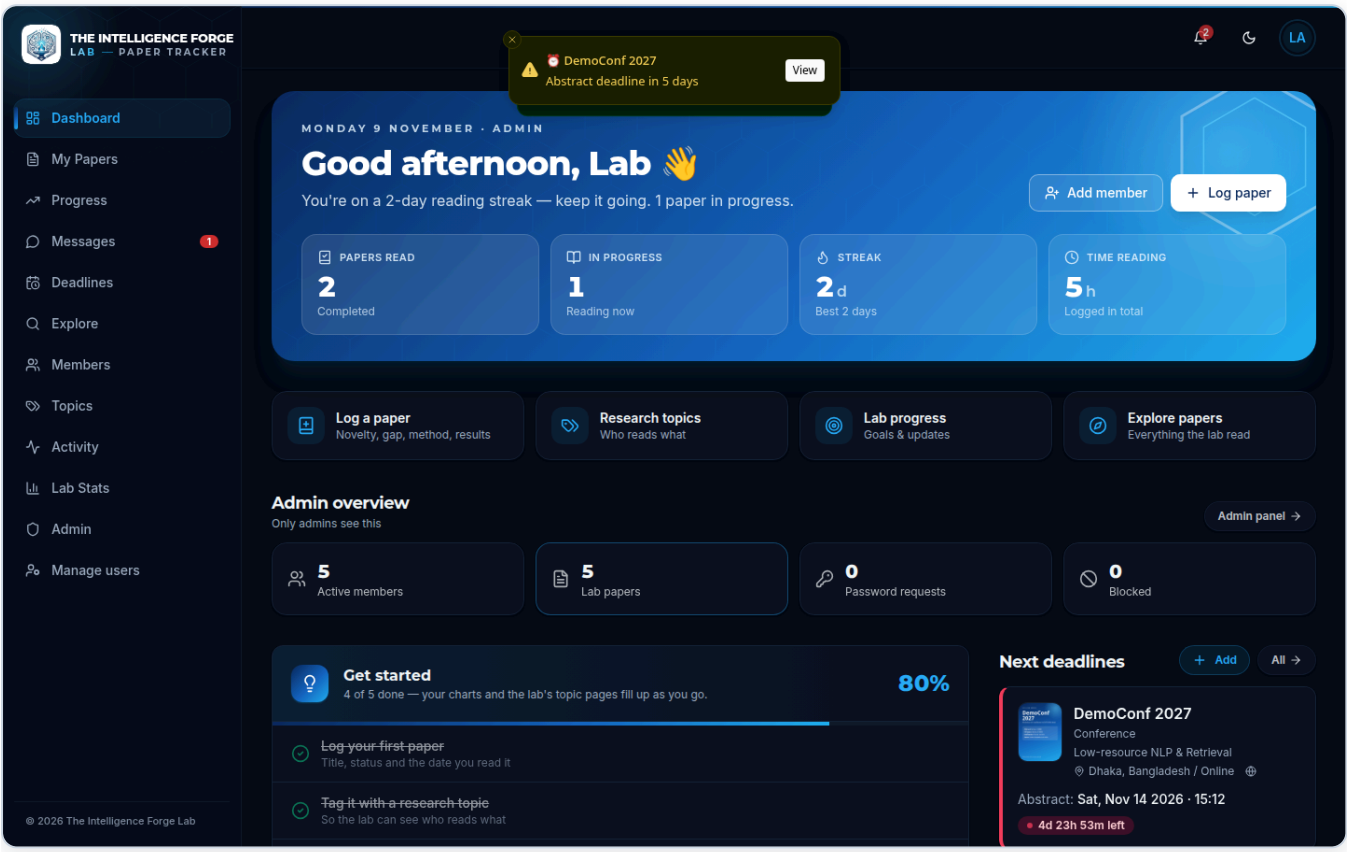

Contents

1. The screen at a glance
2. Signing in for the first time
3. Forgot your password
4. Your profile
5. The dashboard
6. Logging a paper
7. Research topics: who reads what
8. Progress: sharing your goals
9. Deadlines, submissions and posters
10. Messages: chat with the lab
11. Notifications and reminders
12. Exploring the lab
13. For admins
14. Common questions

1. The screen at a glance

The screen has two fixed parts: a **sidebar** on the left and a **top bar**.

Sidebar: click any item to open that page.

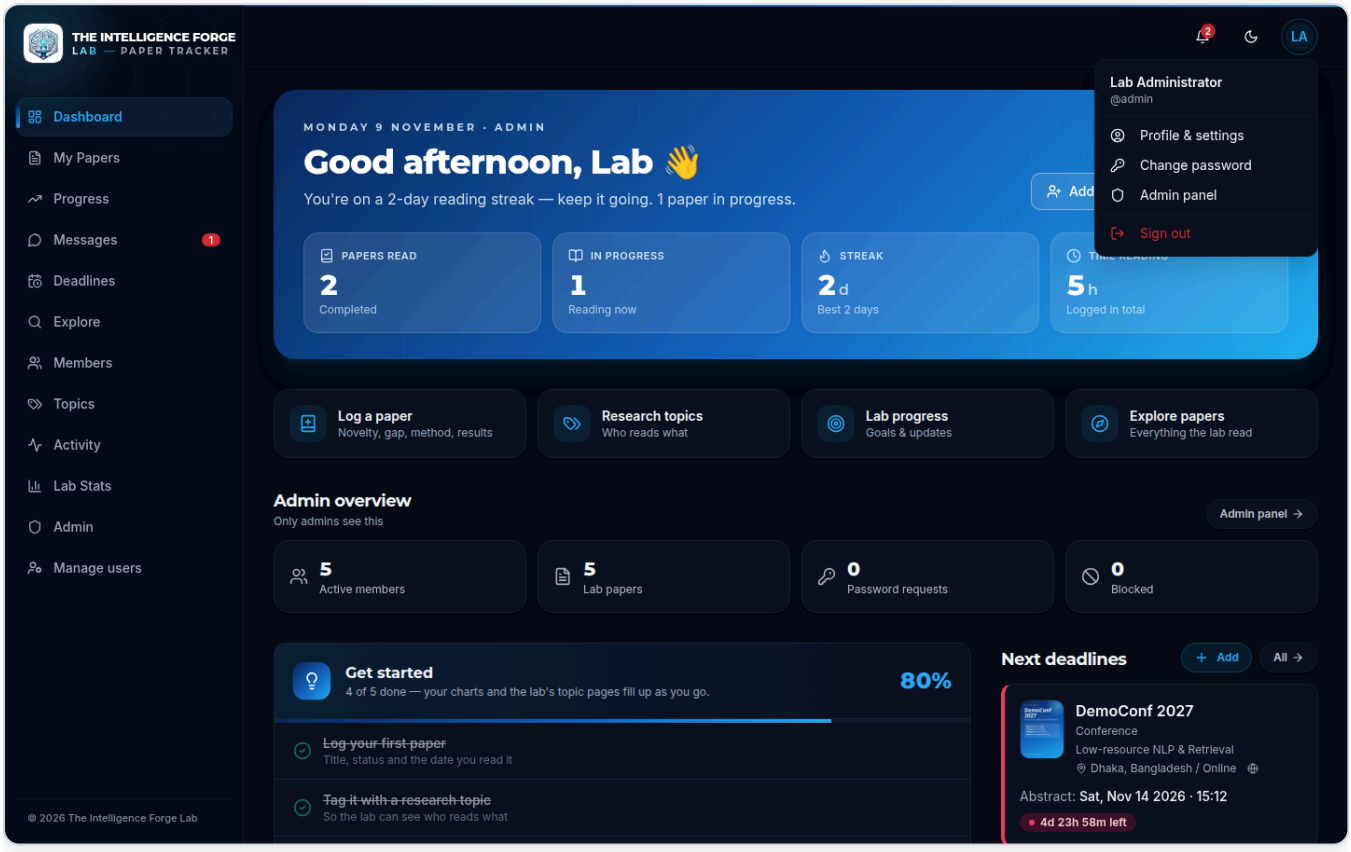

The screen: sidebar on the left; top bar with the bell, theme switch and your photo. The yellow pop-up is a deadline reminder.

Item	What it is for
Dashboard	Your home page: your numbers, goals, deadlines and what the lab is reading
My Papers	Every paper you have logged
Progress	Goals people in the lab are working towards, with progress updates
Messages	Chat with members one-to-one or in groups. A red number shows unread messages.
Deadlines	Conference and journal deadlines, with countdowns
Explore	Search all papers in the lab
Members	Everyone in the lab and what they read
Topics	Research topics, each with its papers and readers

Item	What it is for
Activity	The latest papers and plans across the lab
Lab Stats	Charts for the whole lab
Admin / **Manage users**	Admins only. Hidden for members.

Top bar (top right):

Click your photo for Profile & settings, Change password and Sign out.

- 🔔 **Bell:** unread messages and deadlines due in the next 7 days. Admins also see password requests here. A red number shows how many items there are. The bell also has **Turn on desktop notifications** (see section 11).
- ☾ / ☀**:** switches between dark and light mode.
- **Your photo or initials:** opens a menu with **Profile & settings**, **Change password** and **Sign out**.

The Android app

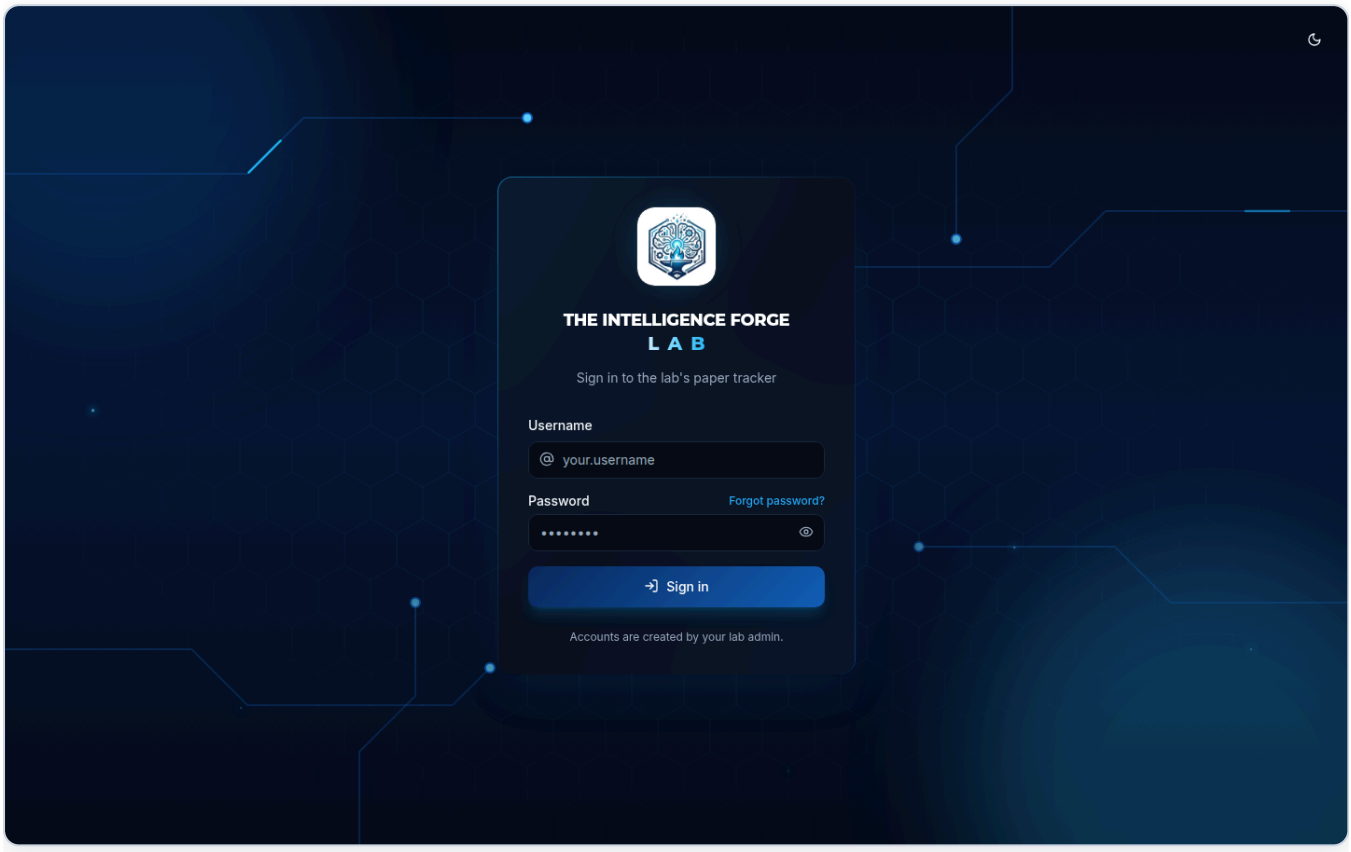

You can also use the Paper Tracker as an app on an Android phone.

1. On the phone, open the website. A **Get the Forge Lab app** banner appears at the bottom; tap **Download**. You can also use **Android app** in the sidebar or on the sign-in page, or this link: https://github.com/towfiqbinhasan/IFG-/releases/download/android-latest/forge-lab.apk

2. Open the downloaded **forge-lab.apk**. If Android asks, allow your browser to **Install unknown apps**, then tap **Install**.
3. Open **Forge Lab** and sign in with your usual username and password.

The app shows the same website, so new features appear in it automatically. You only need a new APK when the admin says so.

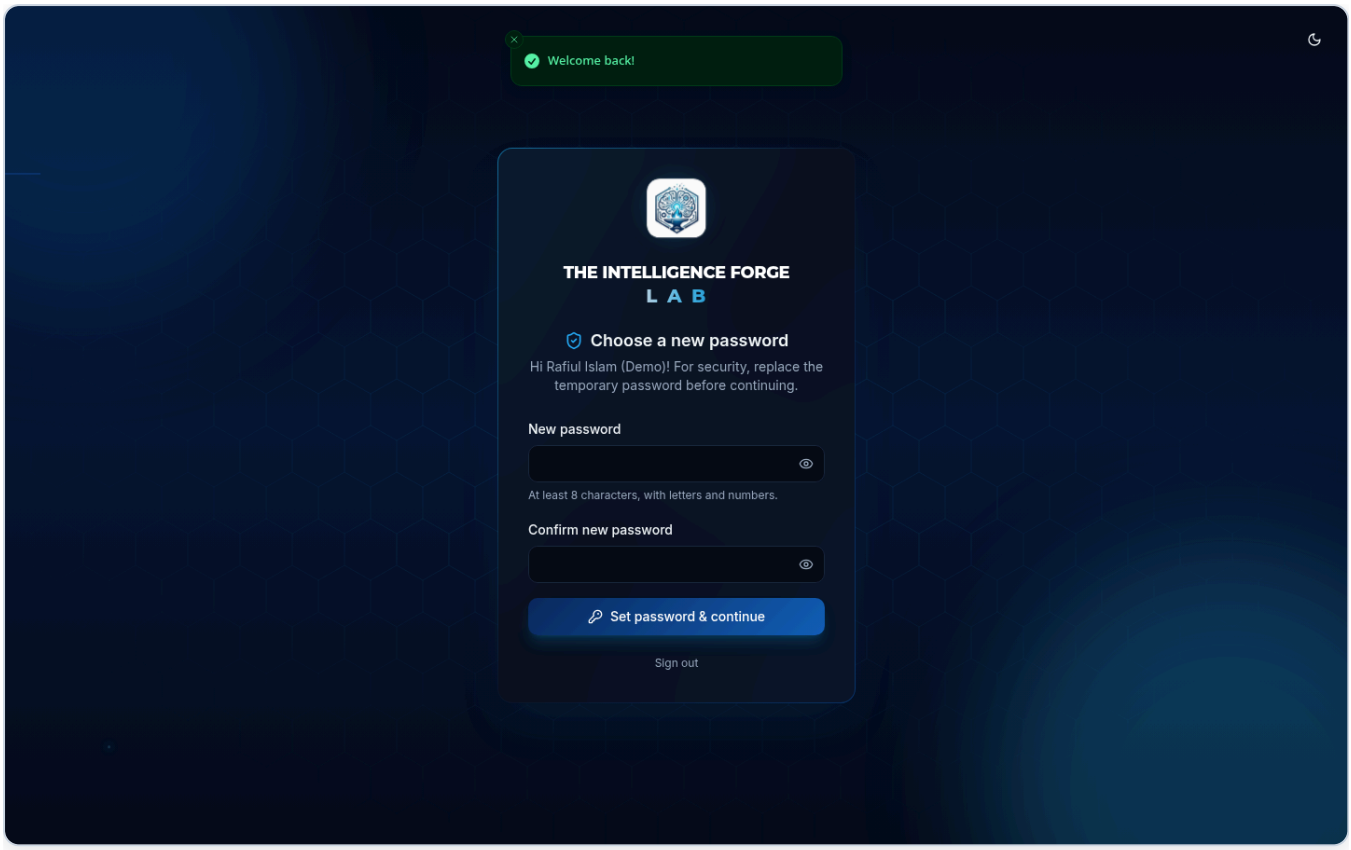

2. Signing in for the first time

The sign-in page.

Your admin creates your account and sends you a **username** (for example `Rahim.IFL.03`) and a **temporary password**.

1. Open the lab's website address in your browser.
2. Type your **username** and **temporary password**, then click **Sign in**.
3. You are asked to choose a **new password**. It needs **at least 8 characters**, with both **letters and numbers**. Type it twice and save.

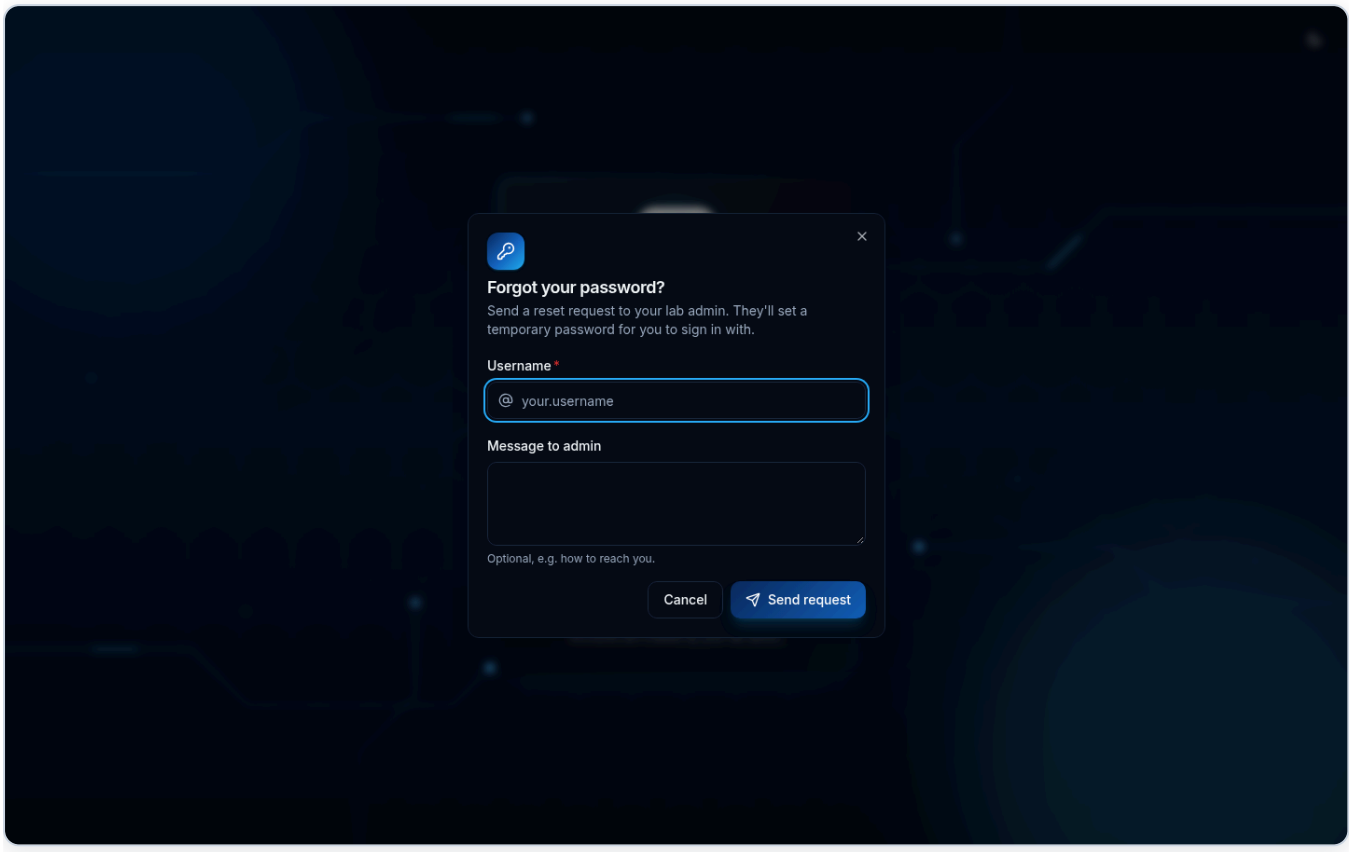

First sign-in: choose your own password.

4. You land on the **Dashboard**.

> **Tip:** sign in with your username, not an email address.

3. Forgot your password

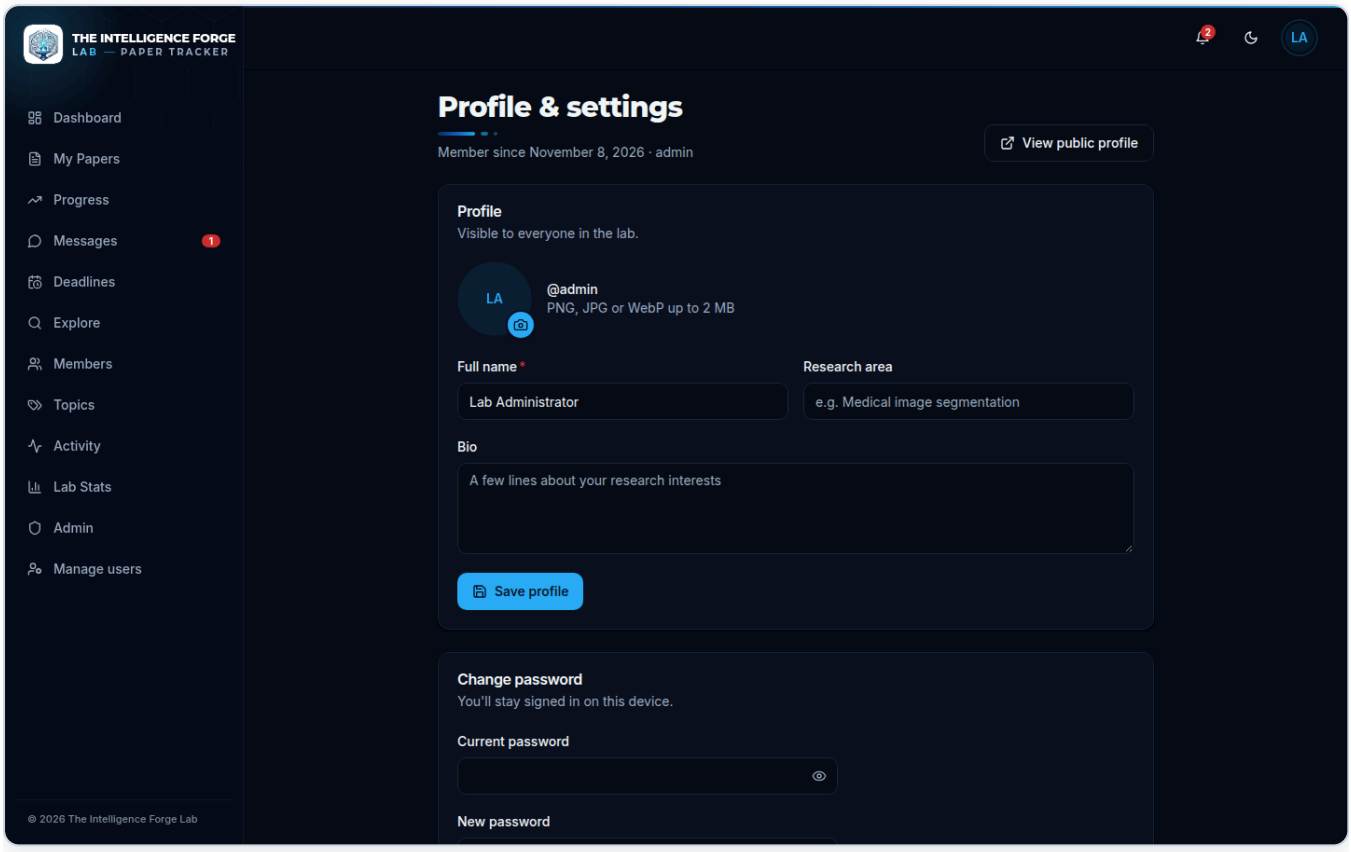

Forgot password? sends a request to your admin.

1. On the sign-in page, click **Forgot password?**, next to the Password field.
2. Enter your **username** and, if you like, a short note. Then click **Send request**.
3. Your admin is notified. They will send you a new temporary password.
4. Sign in with it, then choose your own password again.

To **change** your password while signed in, click your photo (top right) and choose **Change password**. Enter your current password, then the new one twice.

4. Your profile

Profile & settings.

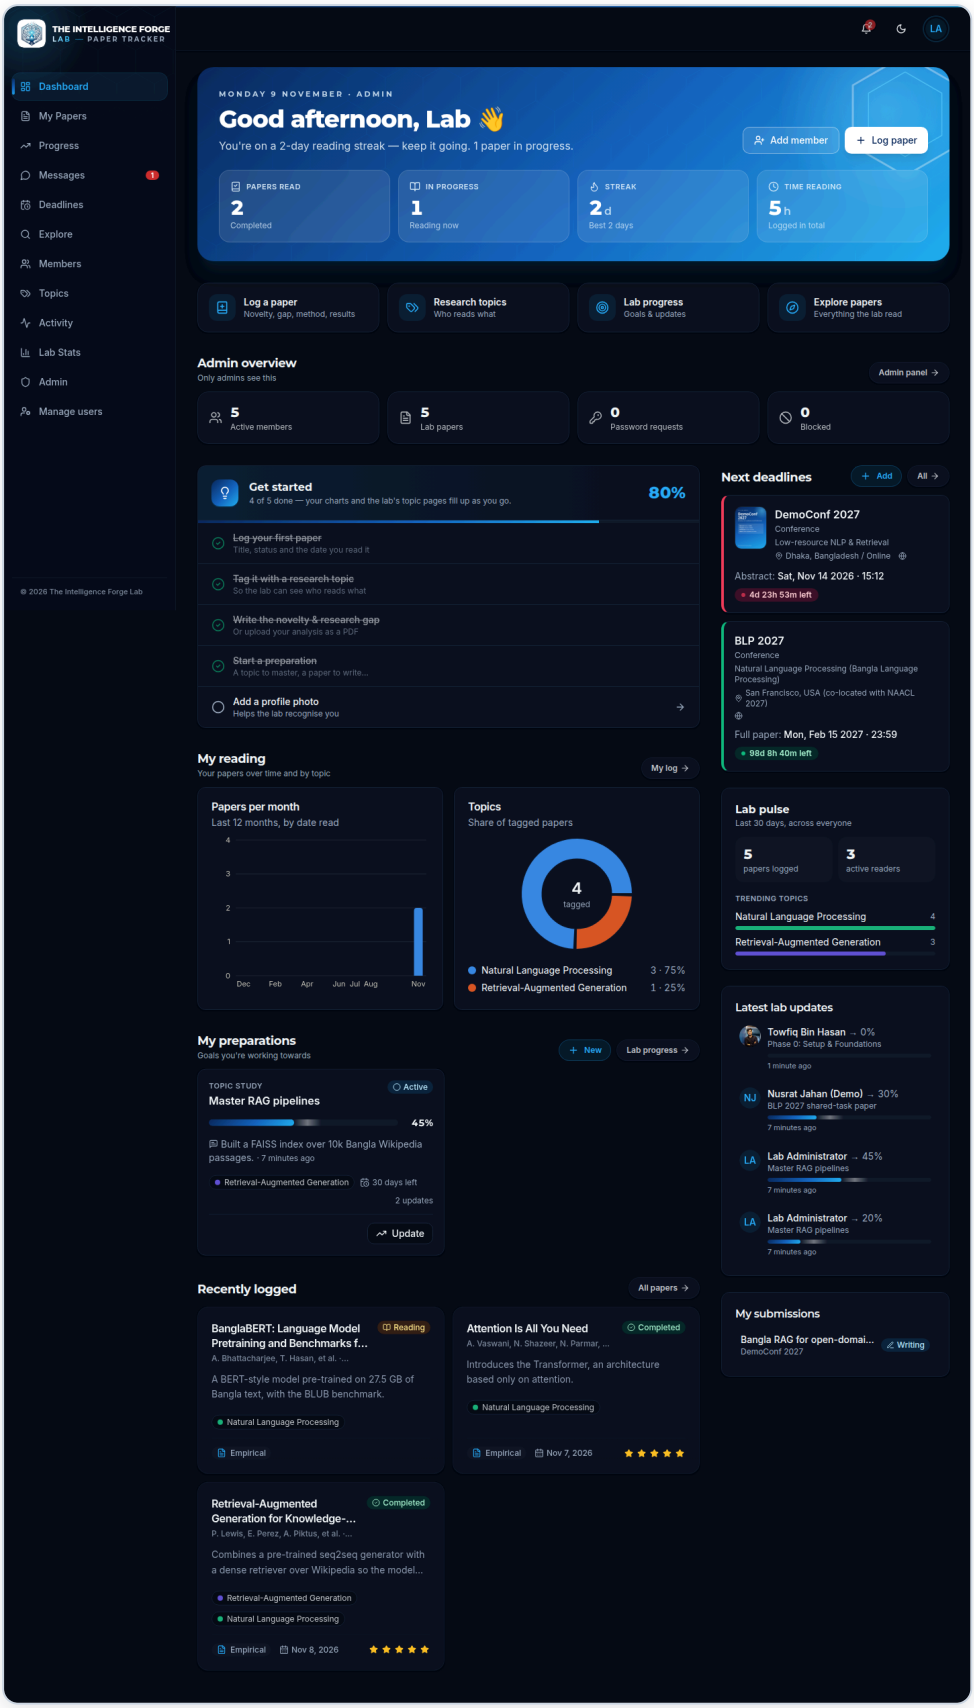

Click your photo (top right) and choose **Profile & settings**. You can:

- upload a **profile photo**
- change your **full name**
- set your **research area**, for example "Bangla NLP"
- write a short **bio**

Click **Save**. Other members see this on the **Members** page and next to your papers.

> Your **username** can only be changed by an admin.

5. The dashboard

The whole dashboard, from the banner down to Recently logged.

The dashboard is your home page. From top to bottom:

The blue banner

- today's date and a greeting
- a one-line summary of your reading, for example your streak or how many papers you read in the last 30 days
- four numbers:

Number	Meaning
Papers read	Papers with status **Completed**
In progress	Papers with status **Reading**
Streak	Days in a row on which you read a paper, counted by each paper's **Date read**. The best streak is shown underneath.
Time reading	Total hours you logged as "Time spent"

- **Log paper** button. Admins also see **Add member**.

Quick actions: four shortcuts: **Log a paper**, **Research topics**, **Lab progress** and **Explore papers**.

Get started: a checklist for new members. It disappears once every step is done.

1. Log your first paper
2. Tag it with a research topic
3. Write the novelty and research gap, or upload an analysis PDF
4. Start a preparation
5. Add a profile photo

Click any step to go straight to the right page.

My reading: two charts, papers per month and your topics. They appear after you log your first paper.

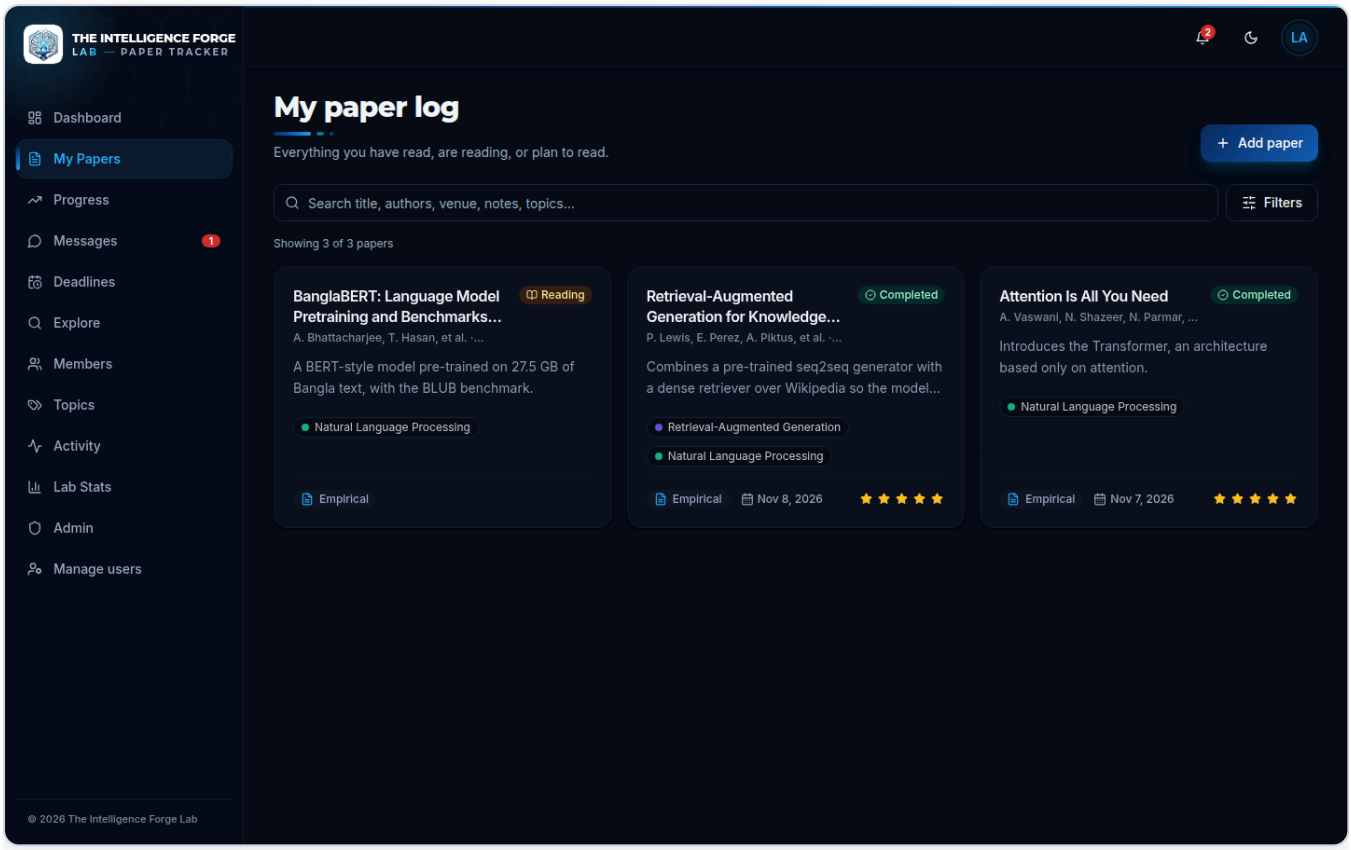

My preparations: your active goals. Click **New** to add one.

Recently logged: your four newest papers.

Right-hand column

- **Next deadlines:** the three nearest conference or journal deadlines, with a countdown and the poster thumbnail. **+ Add** adds a new venue (see section 9).
- **Lab pulse:** papers logged by the whole lab in the last 30 days, how many people are reading, and the **trending topics**. Click a topic to open its page.
- **Latest lab updates:** recent progress updates from everyone
- **My submissions:** papers you plan to submit, with their status

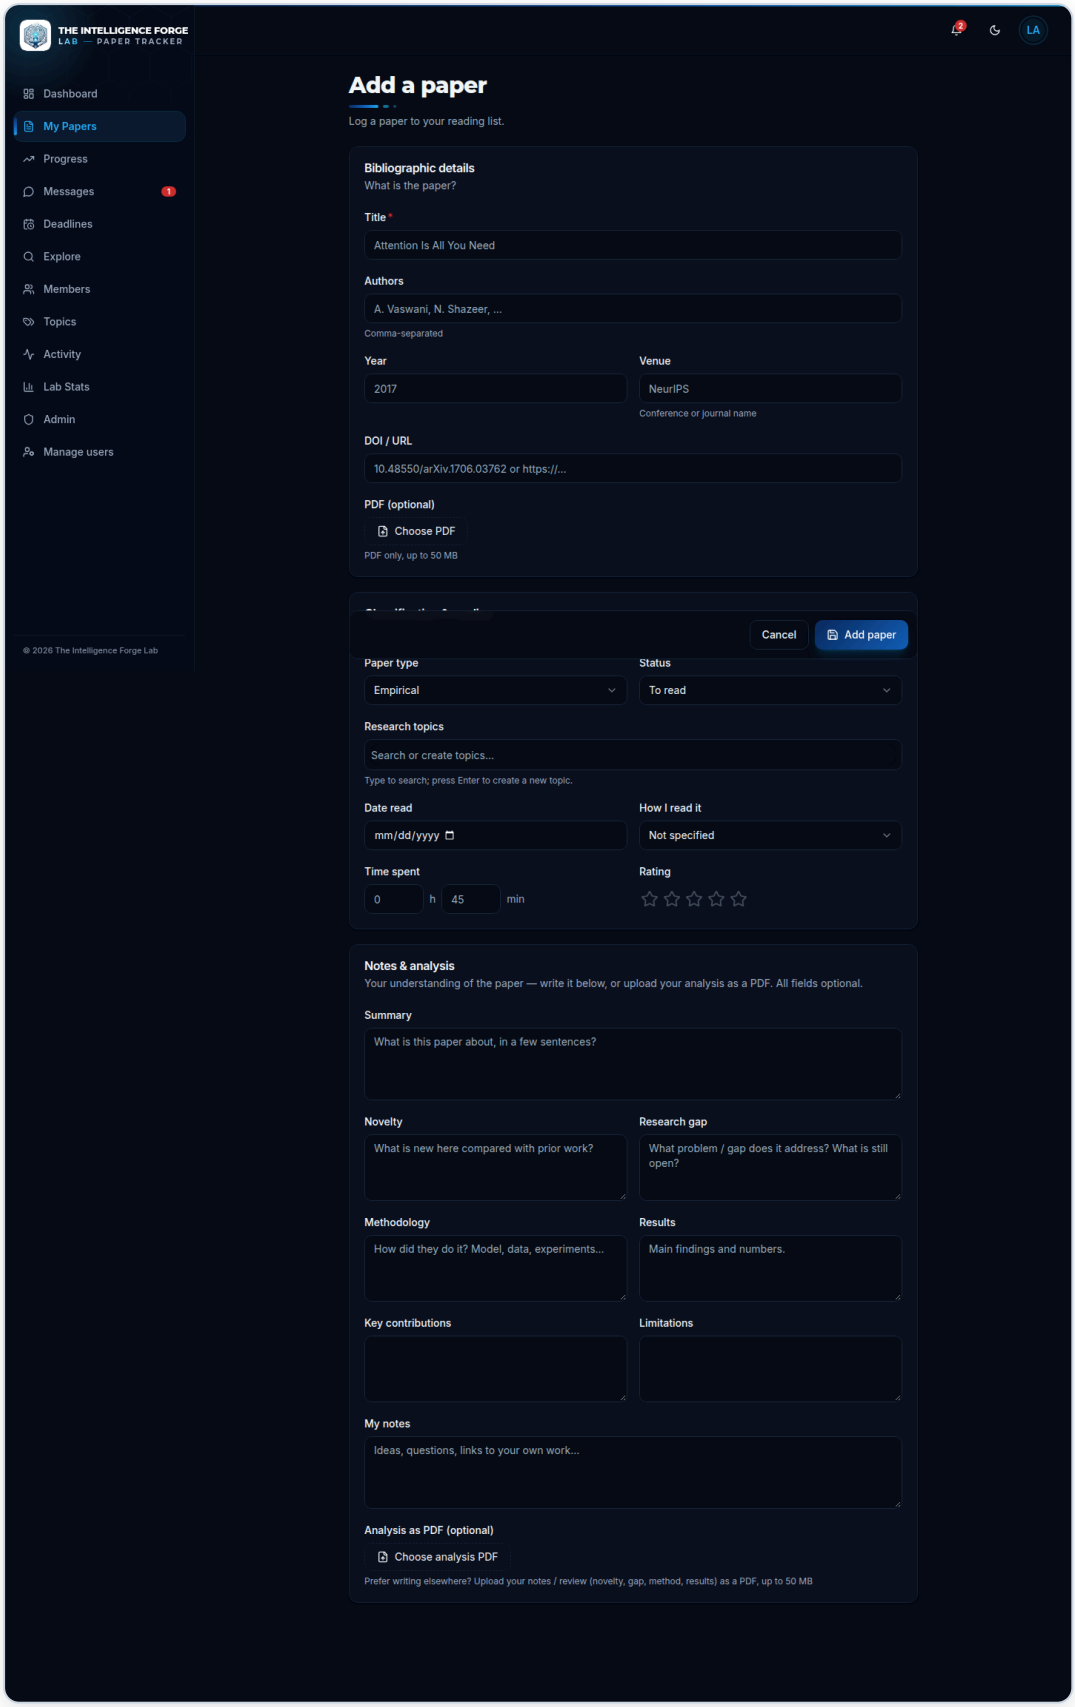

6. Logging a paper

My Papers: everything you have logged, with search and filters.

Click **Log paper** on the dashboard, or **My Papers** → **Add paper**. The form has three parts. Only the **Title** is required.

Part 1: Bibliographic details

The Add paper form (all three parts).

- **Title**, **Authors** (comma-separated), **Year**, **Venue** (conference or journal), **DOI / URL**
- **PDF (optional):** the paper itself, up to **50 MB**

Part 2: Classification and reading

- **Paper type:** Survey, Empirical, Theoretical, Review, Case study, Dataset or Other
- **Status: To read**, **Reading** or **Completed**
- **Research topics:** start typing to find a topic. If it doesn't exist yet, press **Enter** to create it. A paper can have several topics.
- **Date read**, **How I read it** (full read, skim, abstract only, group discussion), **Time spent** (hours and minutes), **Rating** (1–5 stars)

Part 3: Notes and analysis

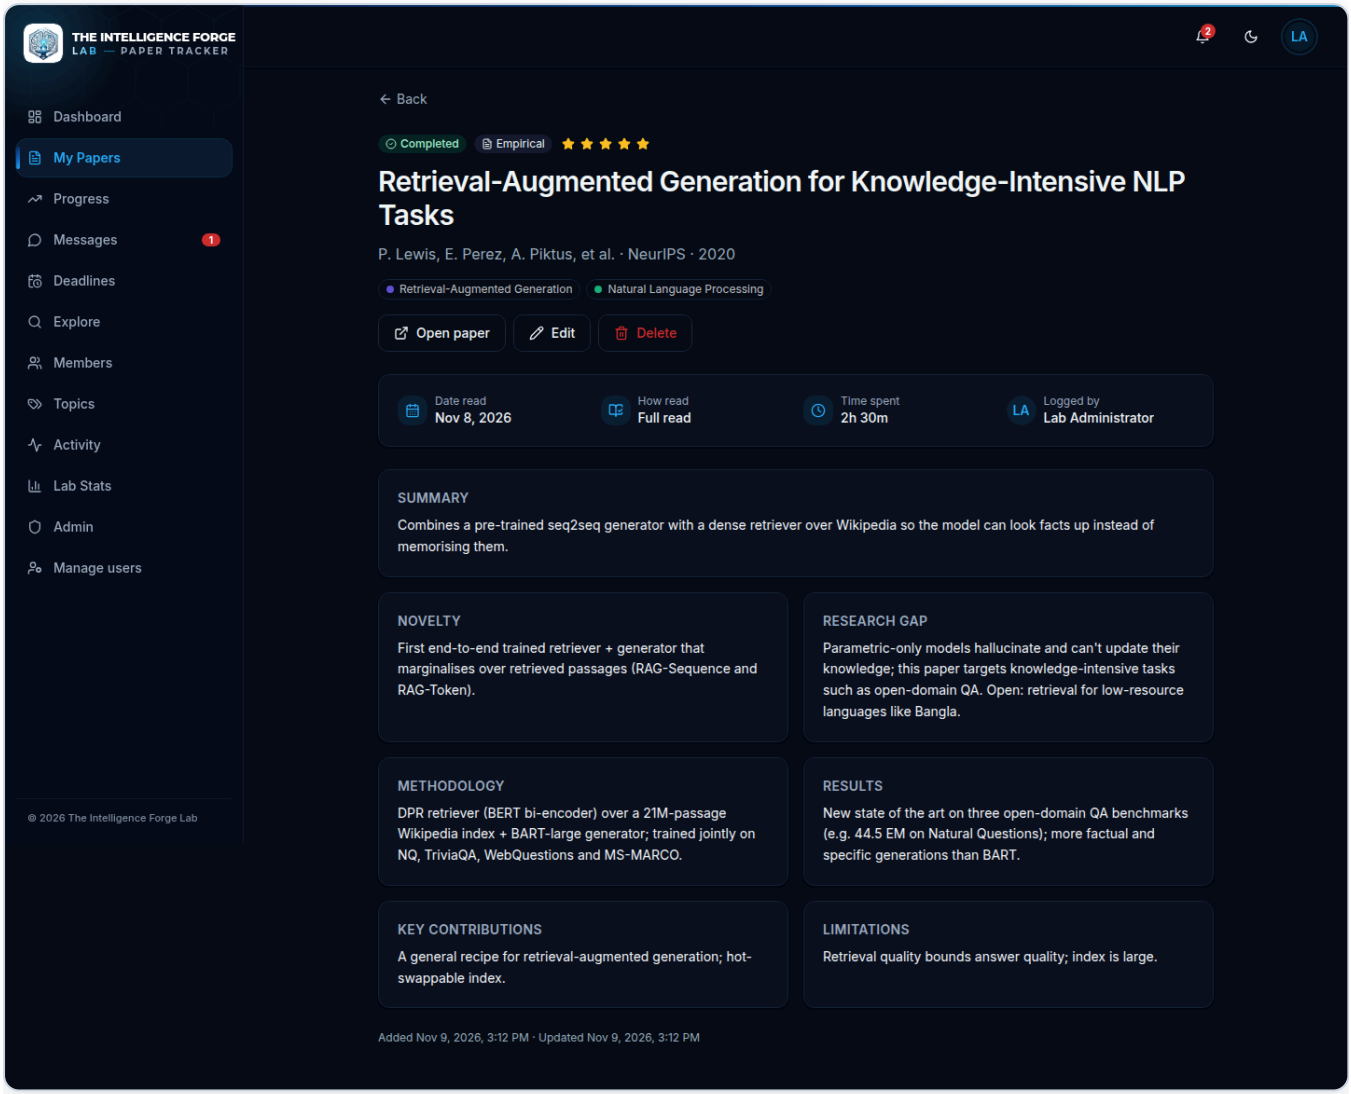

Write your understanding of the paper. Every field is optional.

Field	What to write
Summary	What the paper is about, in a few sentences
Novelty	What is new compared with earlier work
Research gap	The problem or gap it addresses, and what is still open
Methodology	How they did it: model, data, experiments
Results	Main findings and numbers
Key contributions	The main contributions, in your words
Limitations	Weak points and assumptions
My notes	Your own ideas and questions

Prefer to write elsewhere? Under **Analysis as PDF**, upload your notes or review as a PDF (up to 50 MB) instead of typing. The lab can open it from the paper page and the topic page.

Click **Add paper** to save.

Editing and deleting

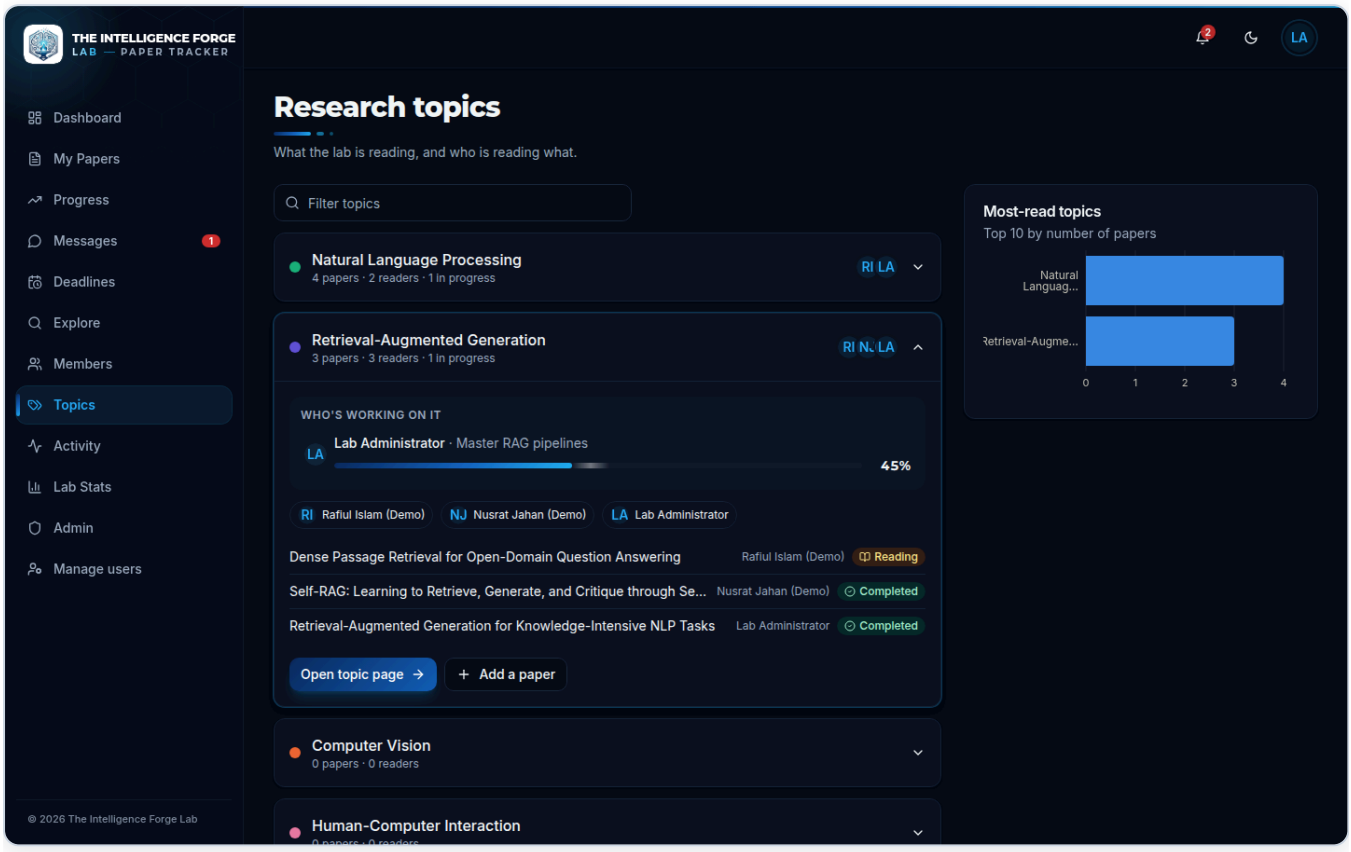

A paper page with novelty, research gap, methodology and results.

Open the paper from **My Papers**, then click **Edit** or **Delete**. Only you can edit your own papers. Admins can delete any paper.

> **Tip:** set **Status = Completed** and fill in **Date read**. Otherwise the paper doesn't count towards your "Papers read", streak or charts.

7. Research topics: who reads what

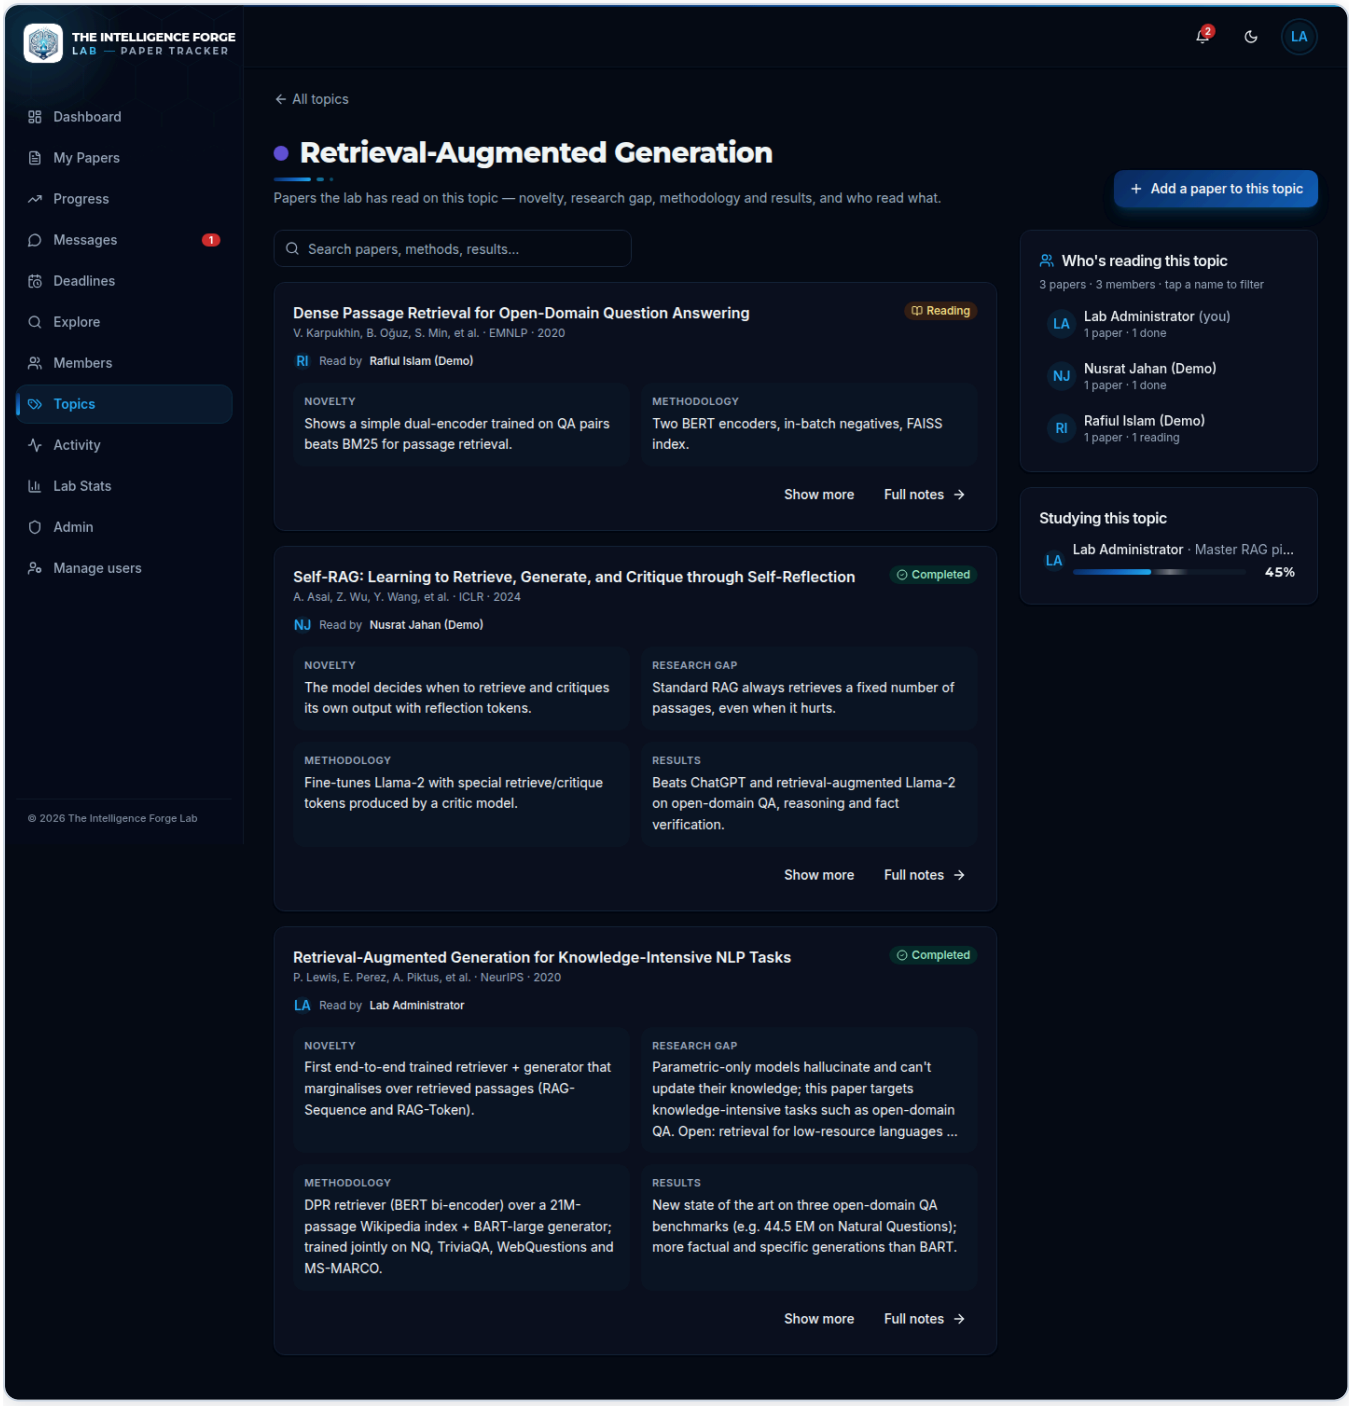

Topics, with one topic opened.

Click **Topics** in the sidebar. Every topic shows how many papers and readers it has.

- Click a topic to expand it. You see who is reading it, the latest papers, and anyone "working on it" in **Progress**.
- Click **Open topic page** for the full view.

The topic page

A topic page: every paper with its analysis, and who is reading it.

Left: every paper on this topic. Each card shows:

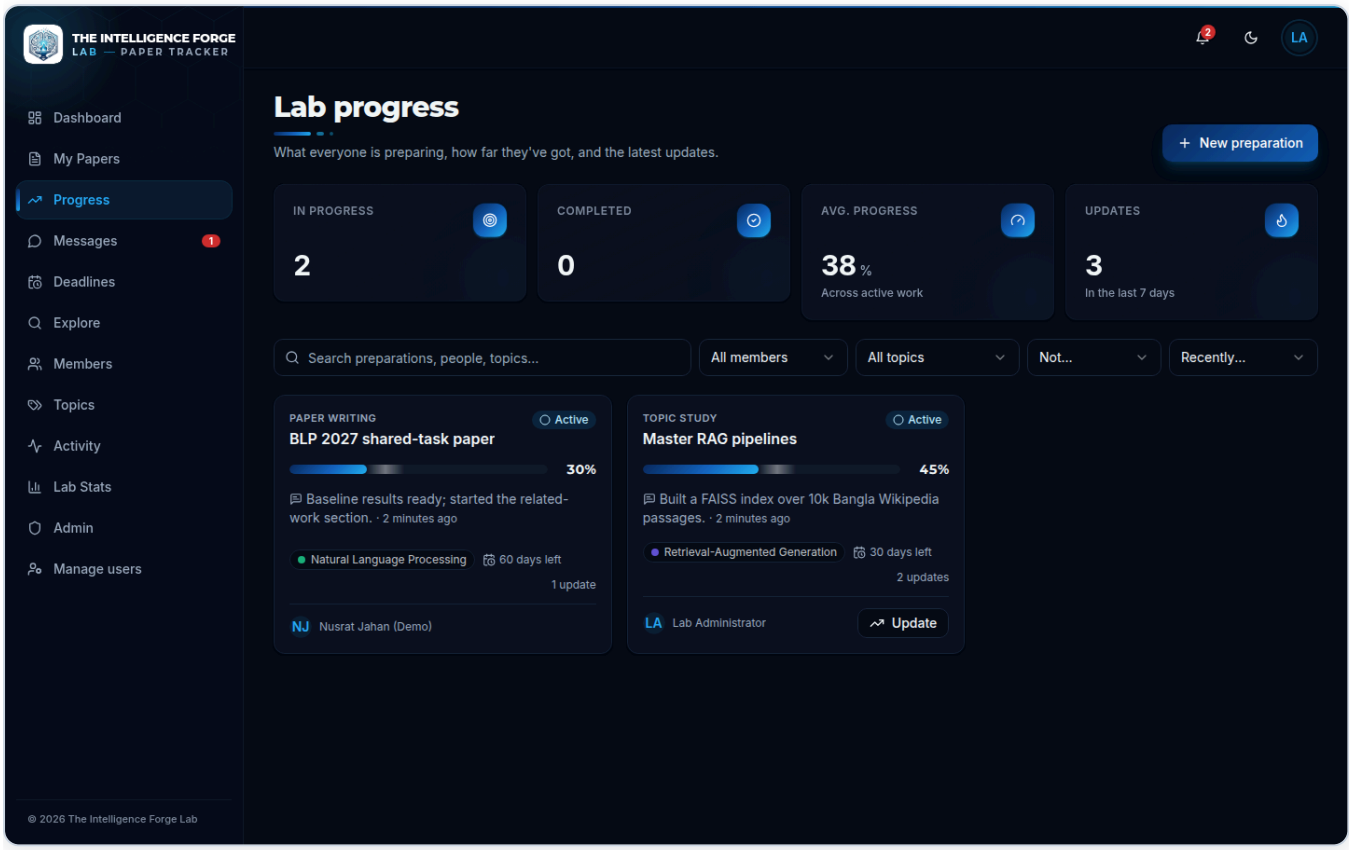

- the title, authors and venue, plus the status
- **who read it**
- their **Novelty**, **Research gap**, **Methodology** and **Results**. Click **Show more** to read the full text.
- an **Analysis PDF** button, if the reader uploaded one
- **Full notes**, which opens the complete paper page

Use the search box to look inside titles, methods and results.

Right: "Who's reading this topic". This lists every member with papers on the topic, with counts for reading and done. **Click a name** to show only that person's papers. Click **Show everyone** to undo.

Add a paper to this topic (top right) opens the paper form with this topic already selected.

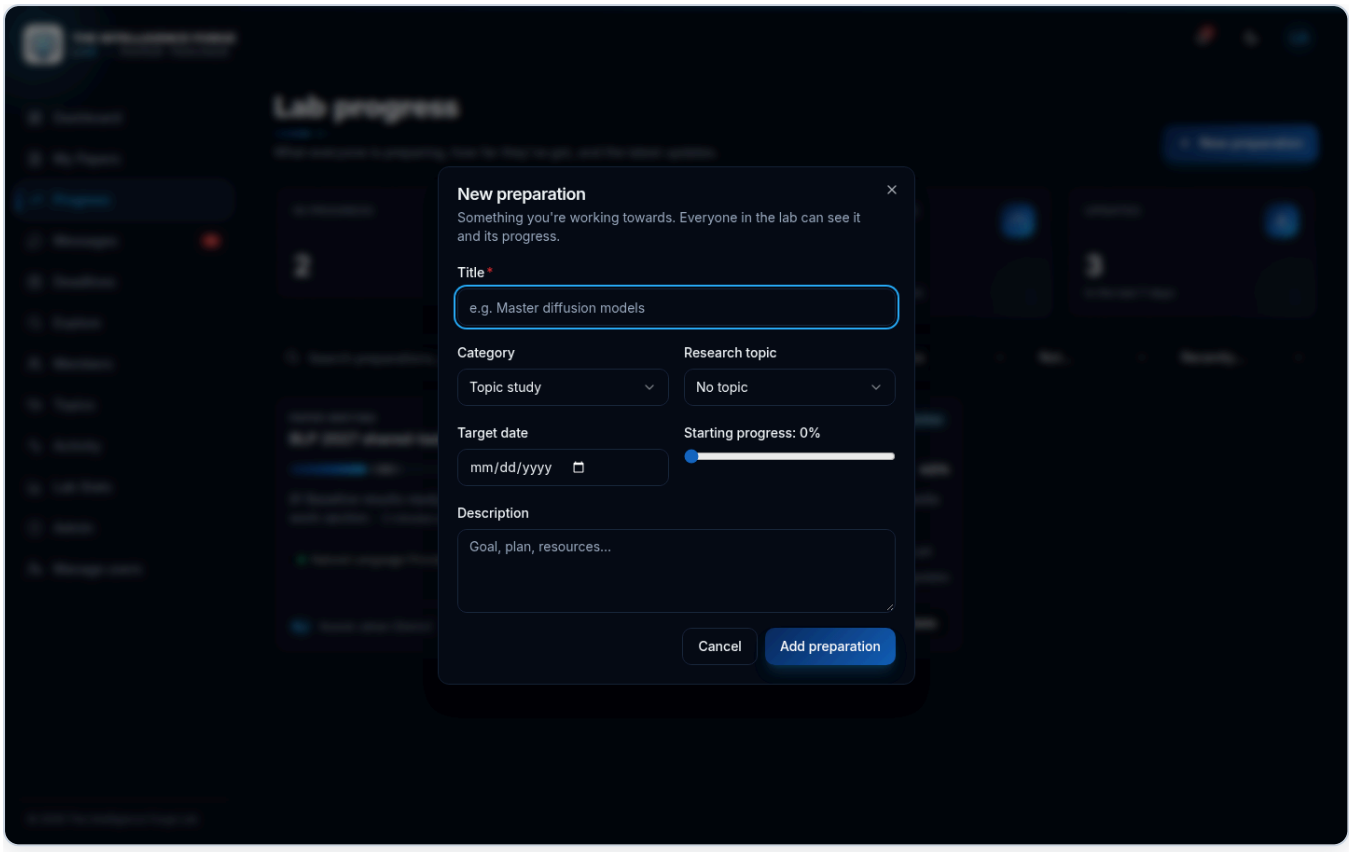

8. Progress: sharing your goals

The Progress board.

A **preparation** is something you are working towards, for example learning a topic, writing a paper, running an experiment or preparing for an exam. The whole lab can see it.

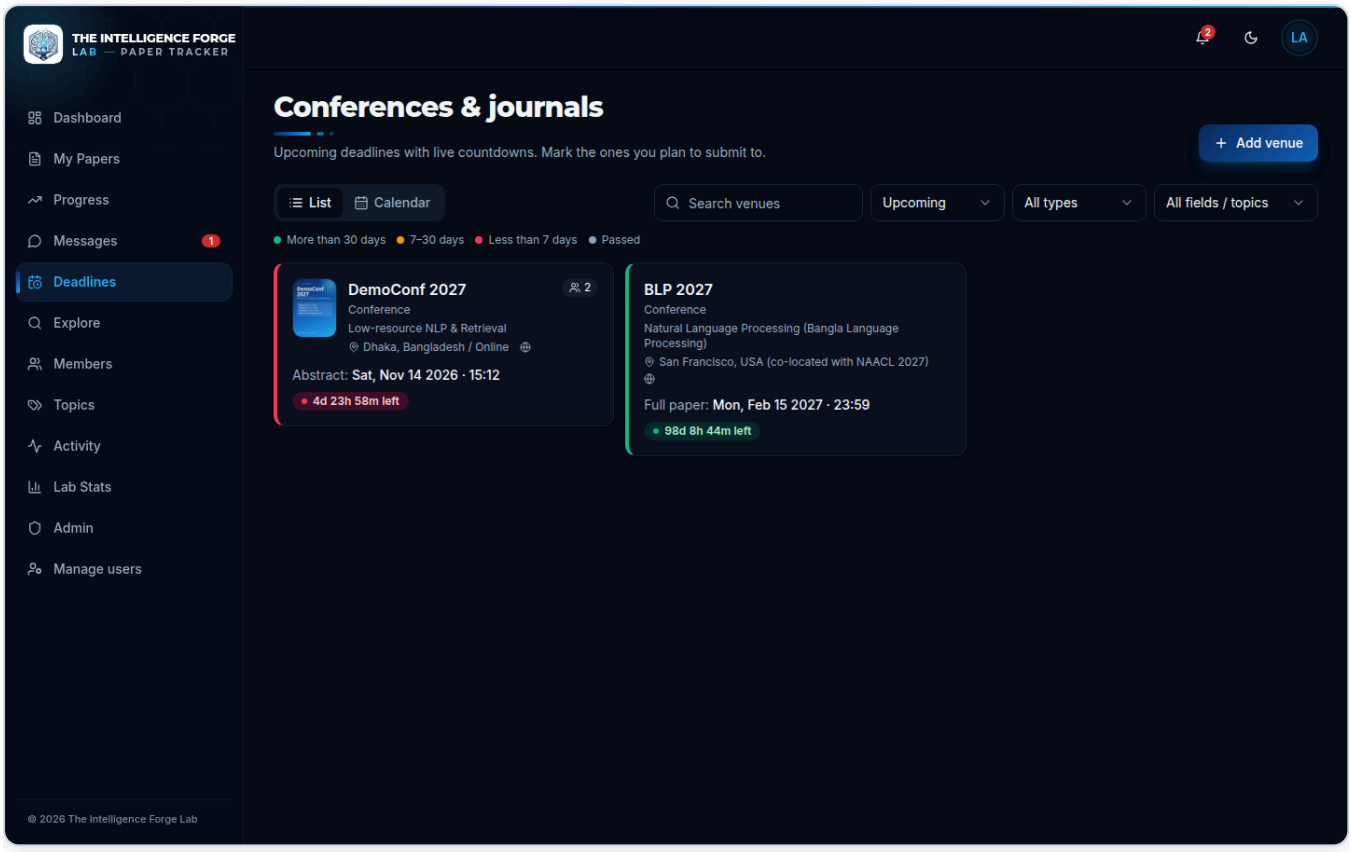

1. Open **Progress** and click **New preparation**, or use **New** on the dashboard.
2. Enter a **Title** and **Category**. Optionally add a **research topic**, a **target date**, a starting percentage and a description.
3. As you make progress, open the preparation and click **Post update**. Set the new percentage with the slider or the 10/25/50/75/100% buttons, and write what you did.
4. At **100%** it is marked **Completed** automatically.

New preparation.

Your updates appear on the **Progress** board, on your profile, on the topic's page, in **Activity**, and in **Latest lab updates** on everyone's dashboard.

9. Deadlines, submissions and posters

Deadlines with live countdowns and posters.

Open **Deadlines**. Venues are sorted by their nearest deadline, with a live countdown:

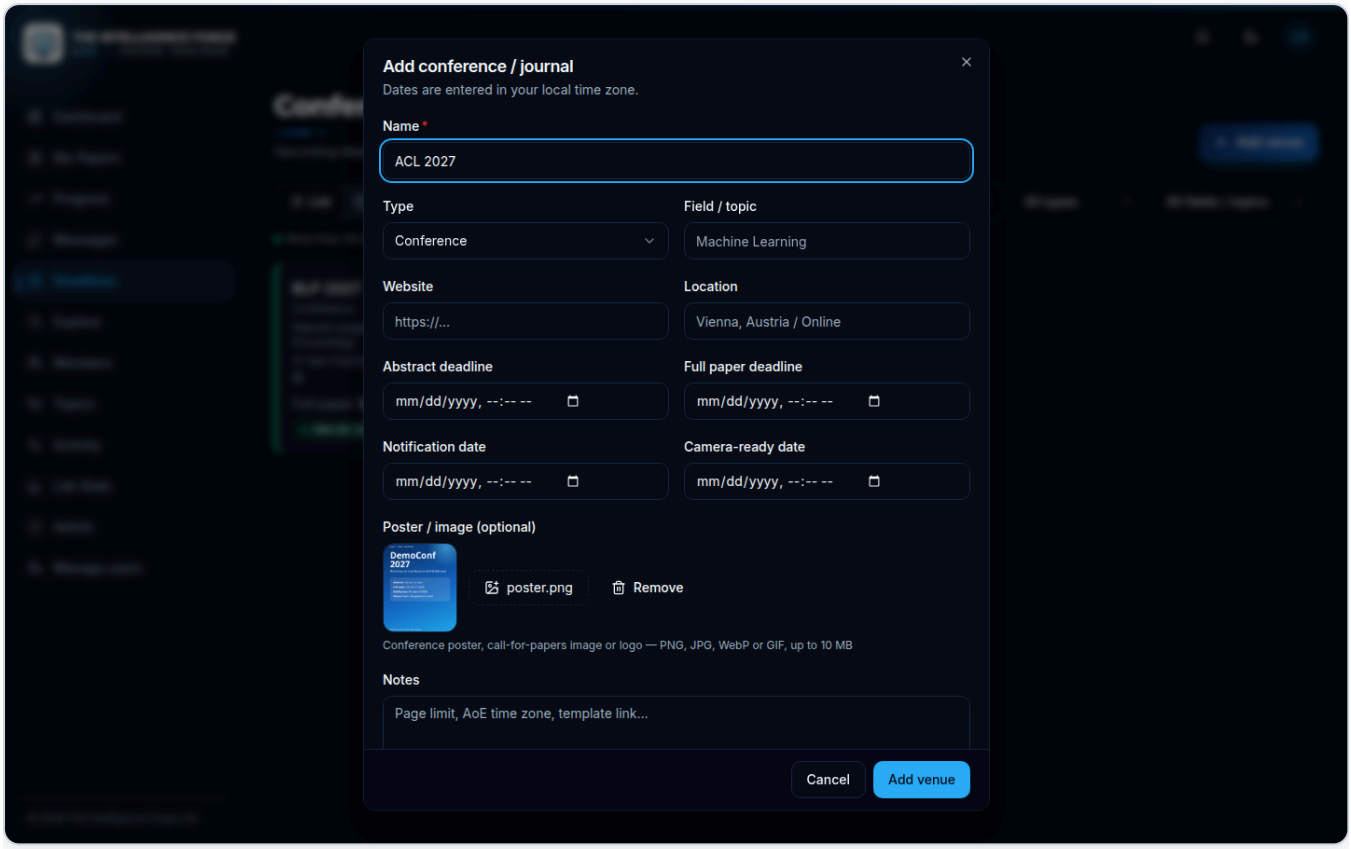

- 🟢 more than 30 days left
- 🟡 7–30 days left
- 🔴 less than 7 days left
- ⚪ passed

You can:

- switch between **List** and **Calendar**
- filter by upcoming or past, conference or journal, and field
- open a venue to see all its dates: abstract, full paper, notification and camera-ready

Planning to submit? Open the venue and click **I'm planning to submit**. Enter your paper title and status (Planning, Writing, Submitted, Accepted or Rejected), and update it as you go. It appears under **My submissions** on your dashboard.

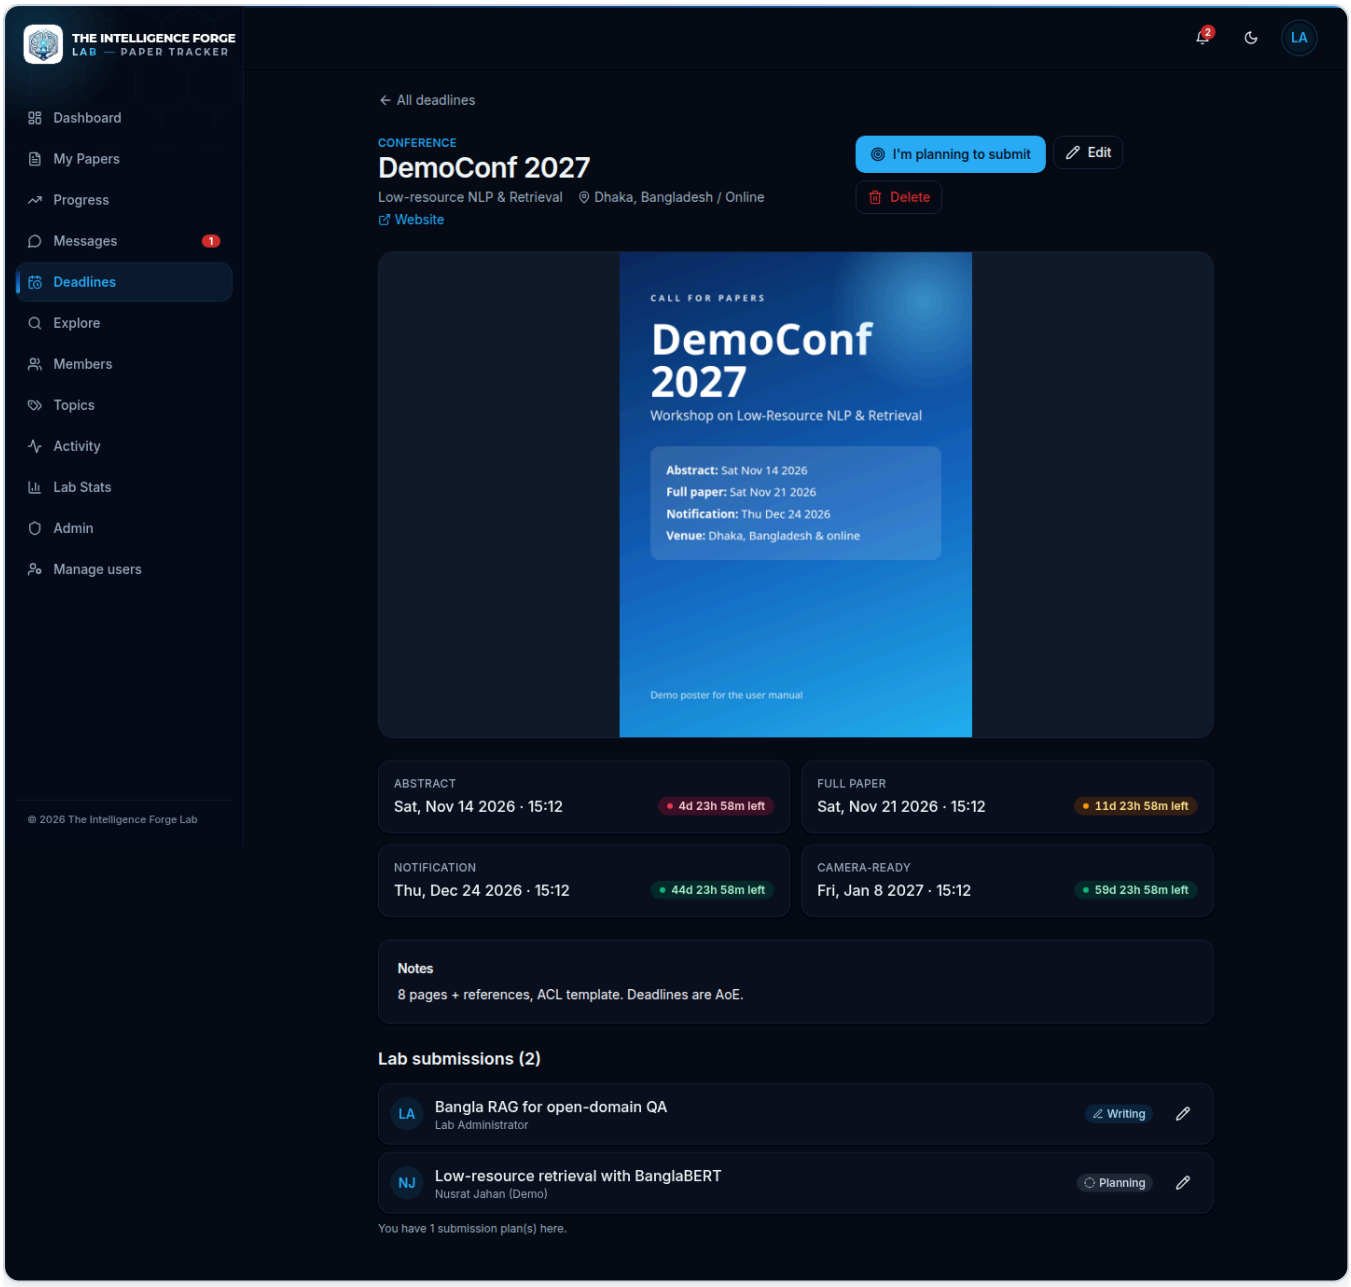

Adding a conference or journal (with a poster)

Add conference / journal, with a poster chosen.

1. Click **Add venue** on the Deadlines page, or **+ Add** under *Next deadlines* on the dashboard.
2. Enter the **Name** (for example "BLP 2027"), **Type**, **Field / topic**, **Website** and **Location**.
3. Fill in the dates you know: **Abstract deadline**, **Full paper deadline**, **Notification date** and **Camera-ready date**. Dates are in your own time zone.
4. **Poster / image (optional):** click **Choose image** and pick the conference poster, call-for-papers image or logo (PNG, JPG, WebP or GIF, up to **10 MB**). A preview appears.
5. Add **Notes** if useful (page limit, template link, AoE time…), then click **Add venue**.

The poster appears as a small picture on the deadline cards and large at the top of the venue

A venue page: poster, all dates and who plans to submit.

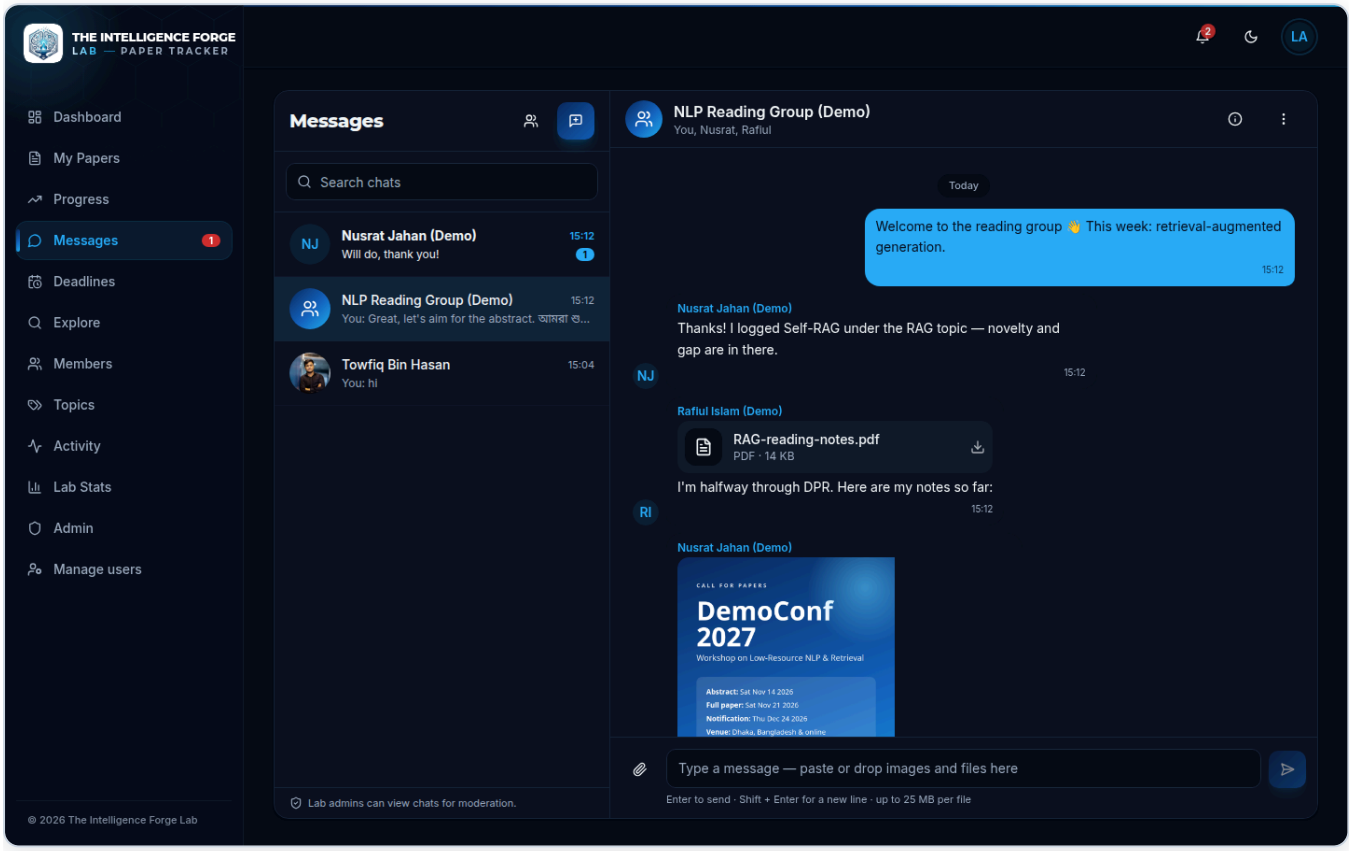

page. Click it there to open it full size. To change or remove it, open the venue and click **Edit**.

Members can add venues when the admin has switched on **"Members can add conferences & journals"** (it is on by default). You can edit or delete only the venues you added. Admins can edit or delete any venue.

10. Messages: chat with the lab

Messages works like WhatsApp, inside the lab tracker. Open it from the sidebar.

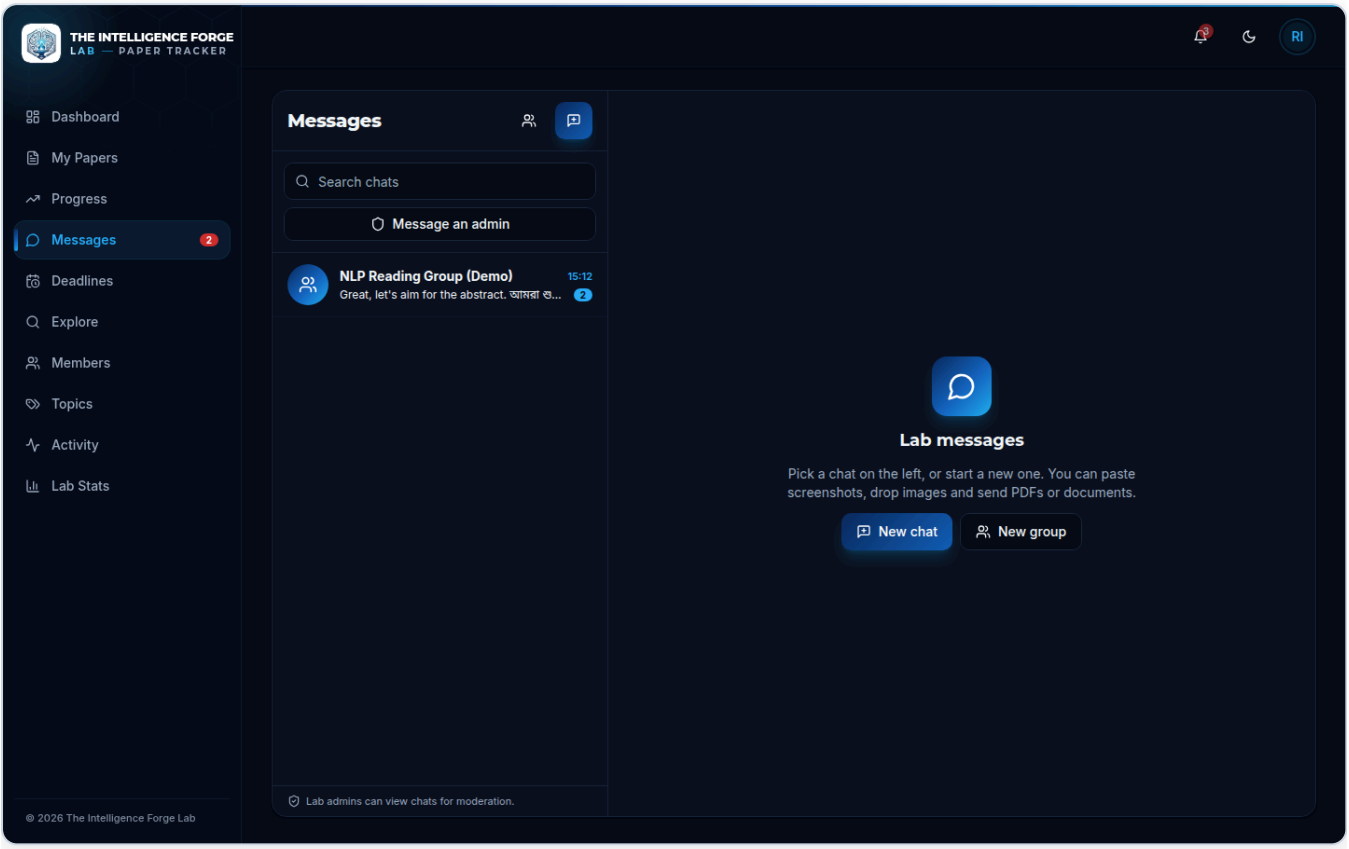

The screen

Messages: chats on the left, the open group chat on the right (with a PDF and an image).

- **Left:** your chats, newest first. Each row shows the last message and its time. Bold text and a blue number mean unread messages. A 🔒 means an admin has blocked that chat.
- **Right:** the open chat. Your messages are on the right in blue; other people's are on the left.

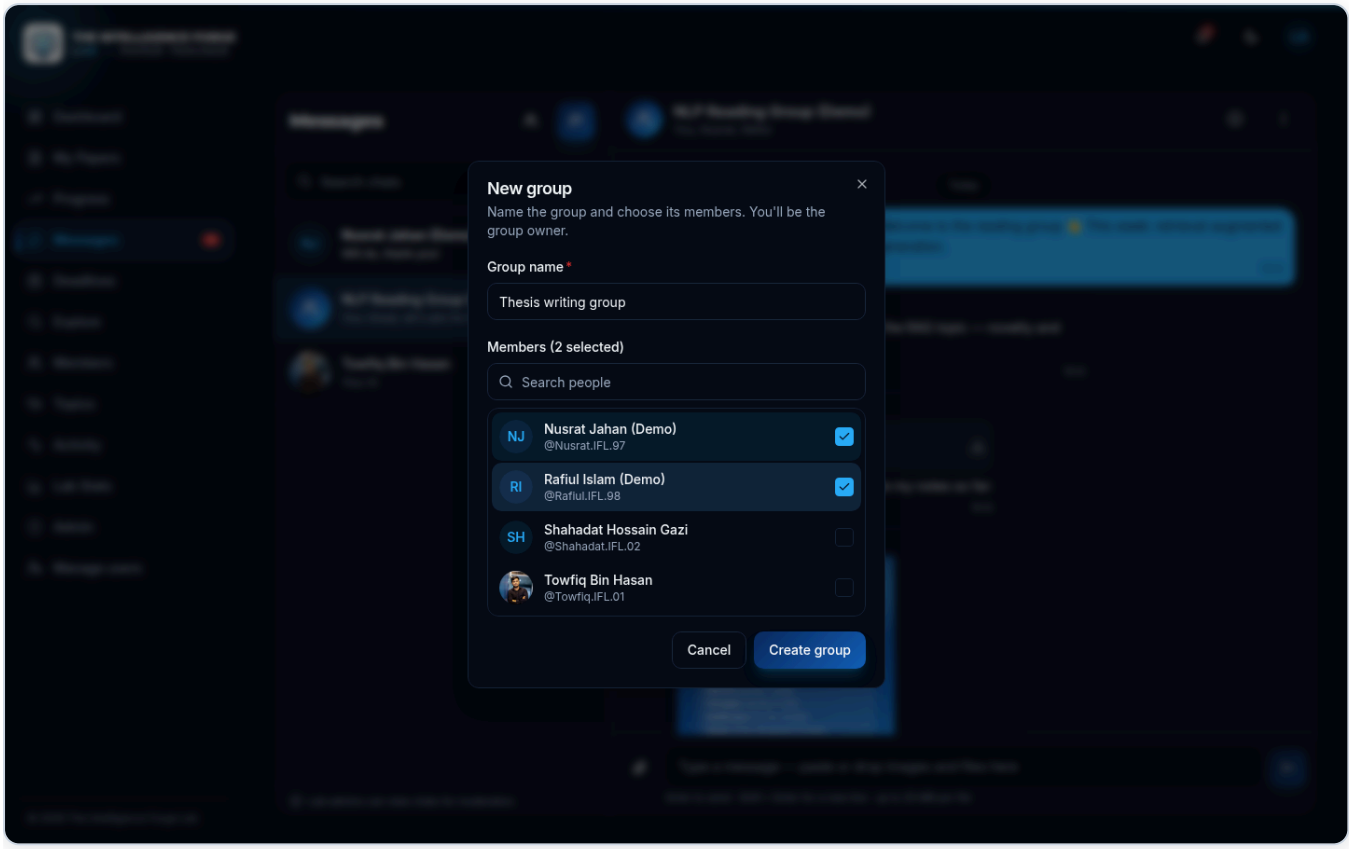

Start a chat

A member's view, with New chat, New group and Message an admin.

- **One-to-one:** click the blue **✚ (New chat)** button and pick a person. Admins are listed first. You can also open someone's profile from **Members** and click **Message**.
- **Message an admin:** click **Message an admin** under the search box.
- **Group:** click the **👥 (New group)** button, type a **Group name**, tick the members and click **Create group**. You become the group's **owner**.

Send messages, images and files

New group: name it and tick the members.

- Type in the box at the bottom and press **Enter** to send. **Shift + Enter** starts a new line. Bangla typing works normally.
- **Paste a screenshot or image:** copy it (for example with the Print Screen key or "Copy image"), click in the message box and press **Ctrl + V**.
- **Drag and drop:** drag files from your computer onto the chat.
- 📎 **Attach:** pick files from your computer.

You can send **images** (PNG, JPG, WebP, GIF), **PDFs**, **Word, Excel and PowerPoint** files, **text/CSV** and **ZIP**, up to **25 MB** each and up to 10 at a time. Files are listed above the box before sending. Click **×** to remove one. Any text you type is sent with the first file.

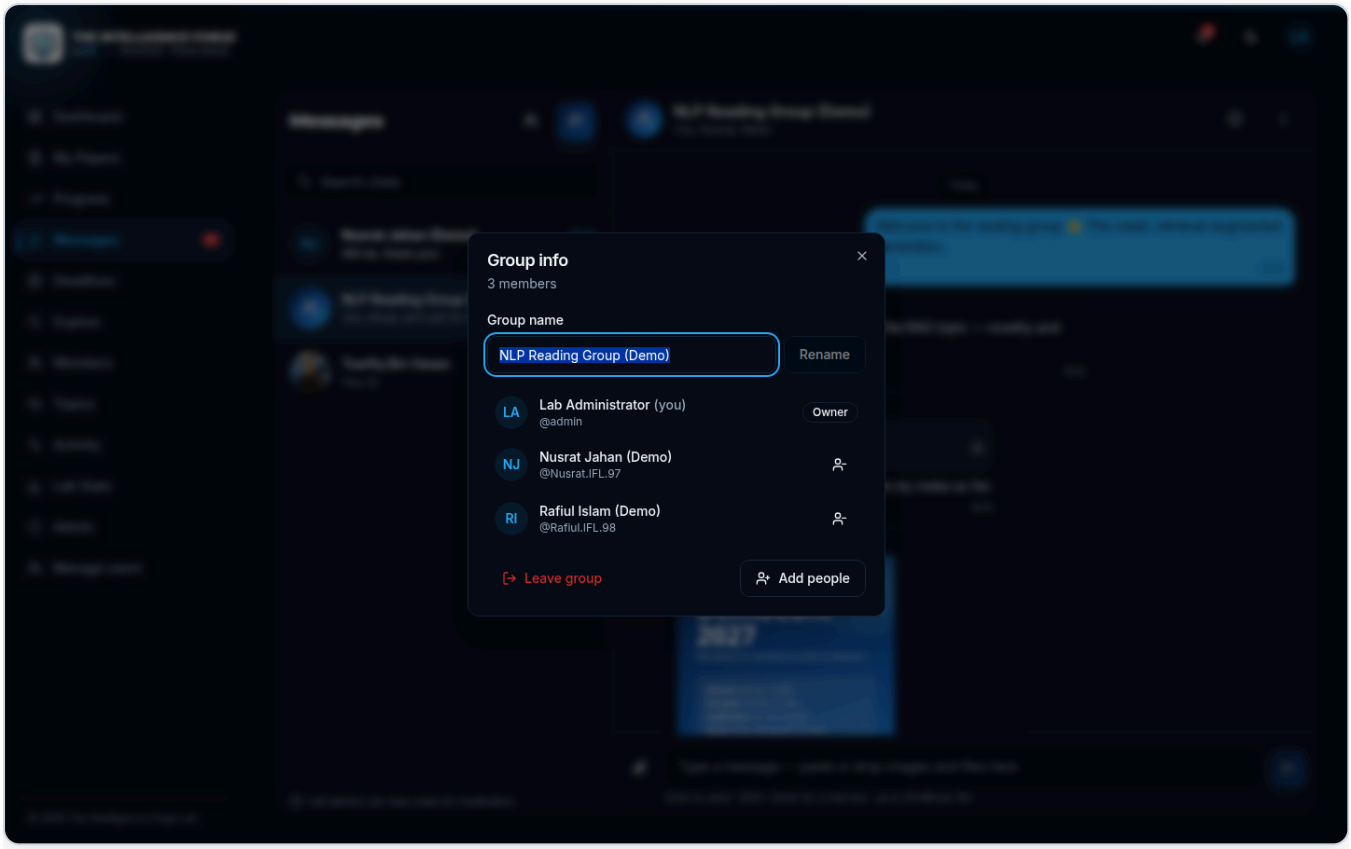

Images show inside the chat. Click one to open it full size. PDFs and documents show as a file card. Click it to open or download.

Message options

Hover over a message and click ⋮:

- **Copy text**
- **Open / download** (for files)
- **Delete:** removes **your own** message for everyone. Admins can delete any message.

Group info

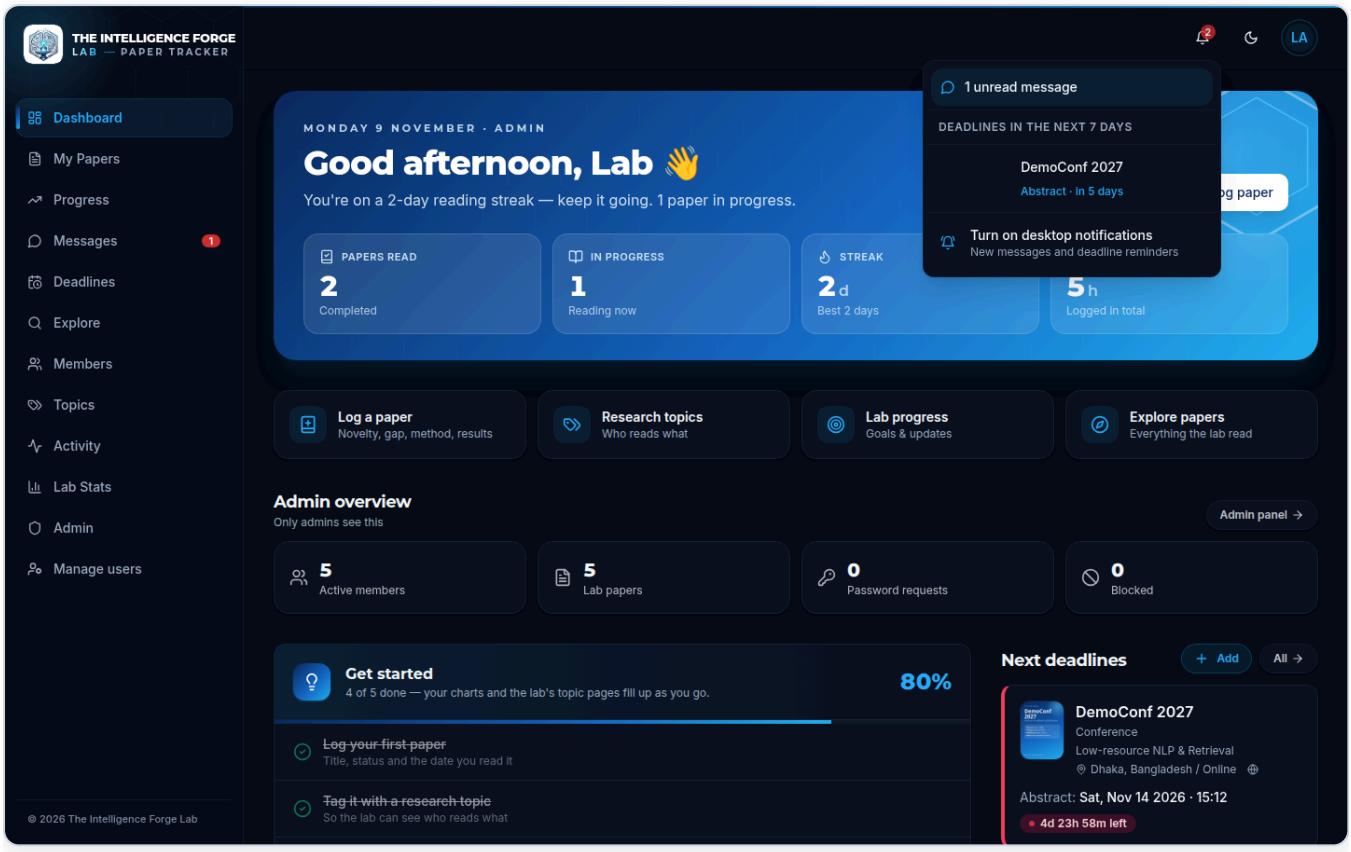

Group info: members, rename, add or remove people, leave.

In a group, click ⓘ at the top right to see the members. The **owner** (and admins) can **rename** the group, **Add people** and remove members. Anyone can **Leave group**. If the owner leaves, the longest-standing member becomes the new owner.

> **Privacy:** chats are visible only to their members **and to lab admins**, who can read chats for moderation. Don't share passwords or other secrets in chat.

11. Notifications and reminders

The bell: unread messages, deadlines and Turn on desktop notifications.

In the app

- The 🔔 **bell** counts unread messages and deadlines in the next 7 days. Click it to see them, then click an item to open it.
- **Messages** in the sidebar shows your unread count.
- When a message arrives while you're on another page, a small pop-up appears at the bottom of the screen with an **Open** button.

Deadline reminders. The app reminds you about abstract and full-paper deadlines **7 days, 3 days, 1 day and on the day**. Each reminder is shown once, as a pop-up when you open the app.

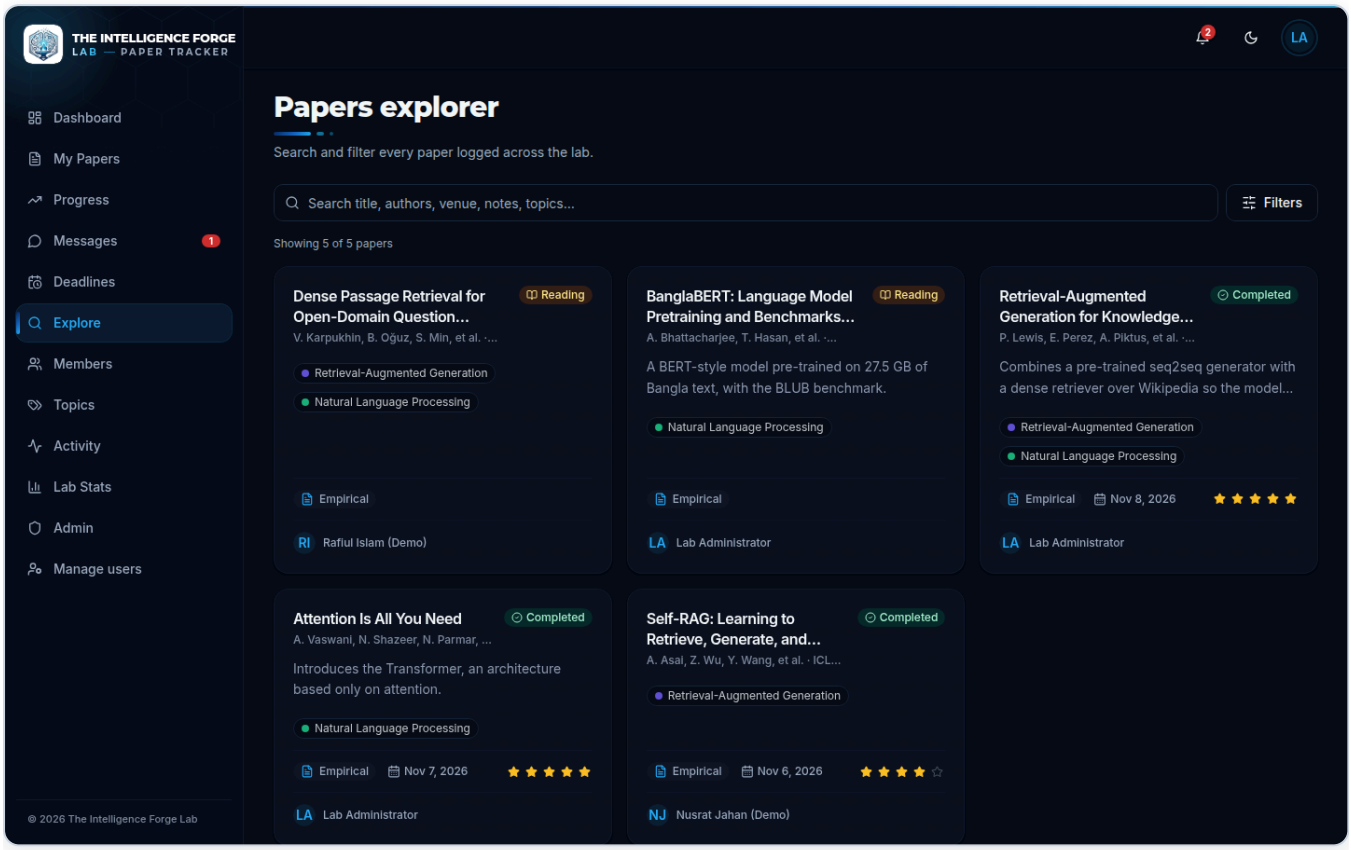

Desktop notifications. You can also get notifications even when the tab is in the background:

1. Click the 🔔 **bell** and choose **Turn on desktop notifications**.
2. When the browser asks, click **Allow**.

From then on, new messages and deadline reminders appear as notifications from your operating system.

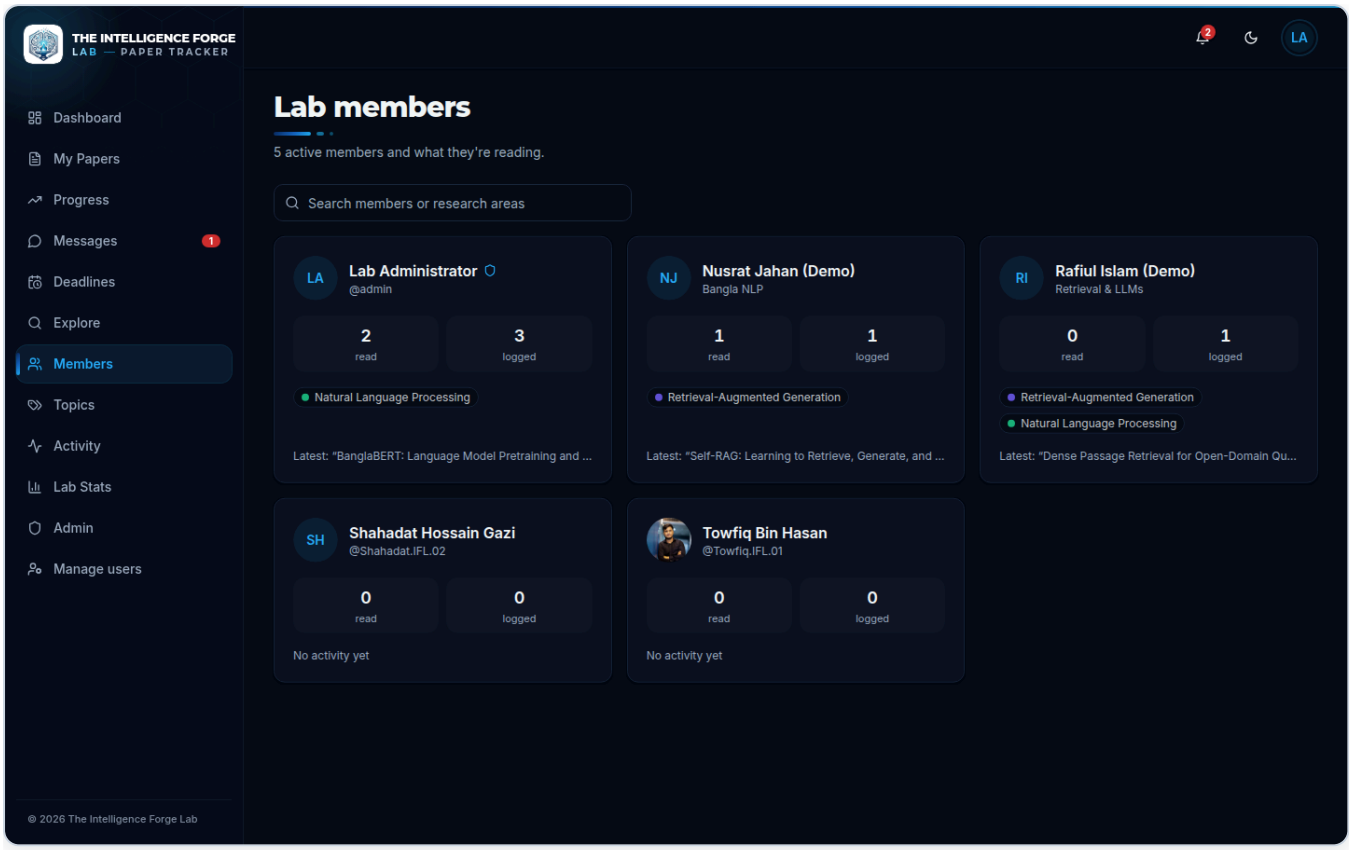

> Desktop notifications work while the Paper Tracker is open in a browser tab. It can be in the background or minimised, but not closed. If you clicked **Block** by mistake, click the 🔒 icon at the left of the address bar, set **Notifications** to **Allow**, and reload.

12. Exploring the lab

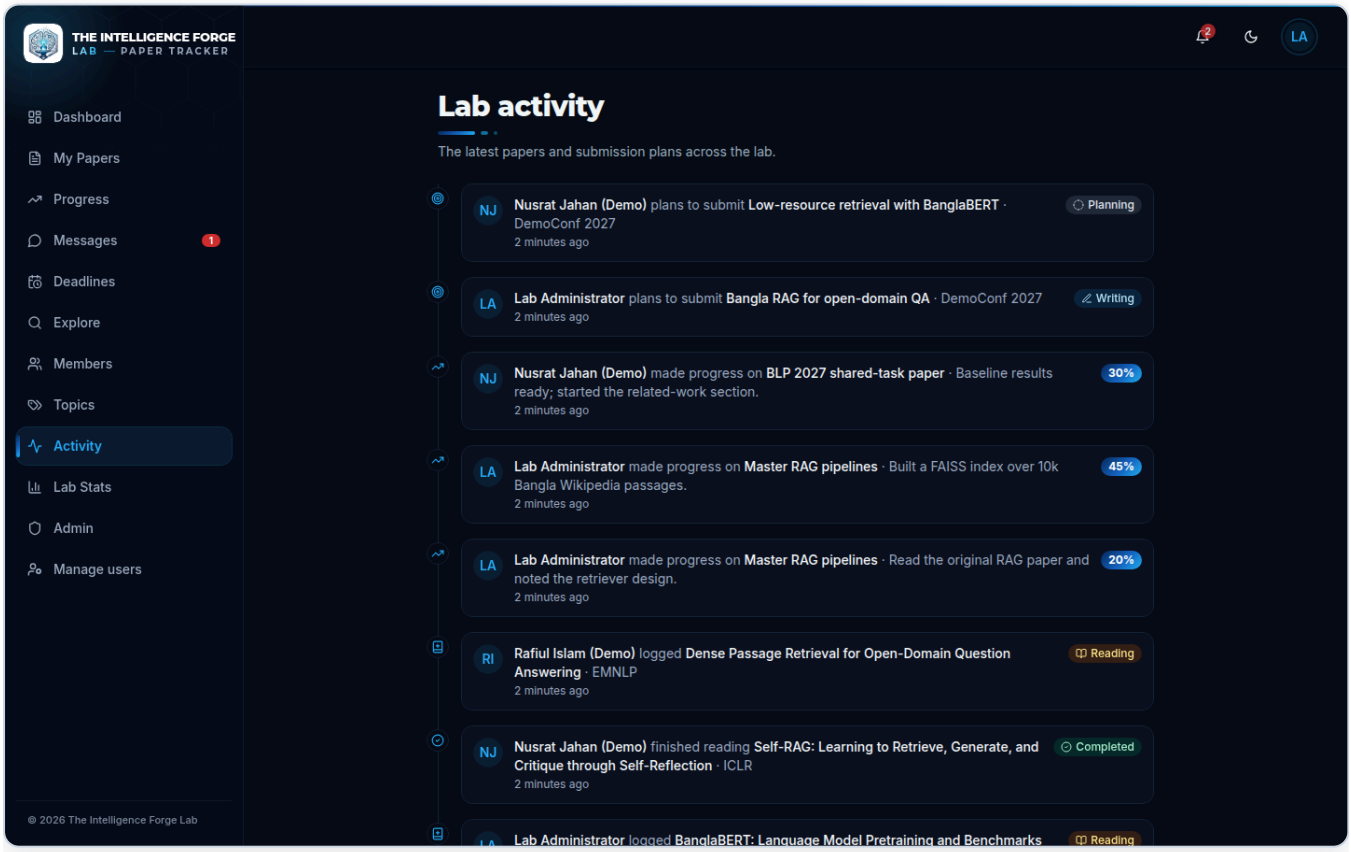

Explore: every paper in the lab.

Page	How to use it
Explore	Search every paper in the lab. Filter by **topic, type, status, year or member**, and change the sort order. Click a paper to read its notes.
Members	Everyone in the lab. Click a person to see their profile, numbers, charts and papers. Their papers are read-only for you.
Activity	A timeline of new papers, submissions and progress updates
Lab Stats	Lab-wide charts: papers per month, topics, paper types and top readers

Lab Stats.

13. For admins

Only accounts with the **Admin** role can do the things in this section. Members don't see the **Admin** or **Manage users** links, can't open those pages, and the server rejects their requests.

13.1 The admin overview on the dashboard

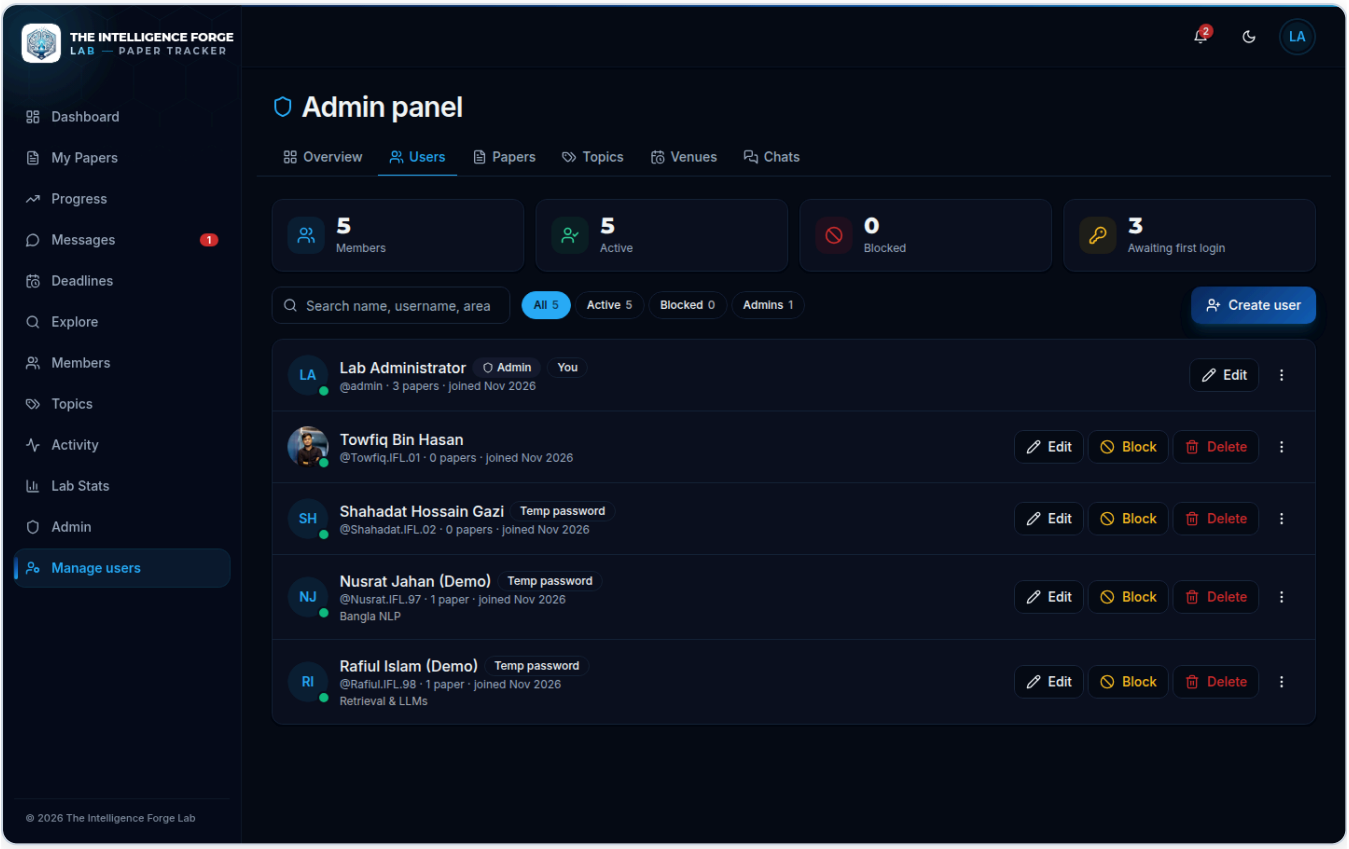

Admin → Overview.

Admins see an extra row on the dashboard. Click any tile to jump to the admin pages.

Tile	Meaning
Active members	Accounts that can sign in
Lab papers	Every paper logged in the lab
Password requests	Turns yellow when someone is waiting for a reset
Blocked	Blocked accounts

13.2 Manage users

Manage users: summary, filters, and Edit / Block / Delete on every row.

Open **Manage users** in the sidebar, or **Admin → Users**.

At the top: counts of **Members**, **Active**, **Blocked** and **Awaiting first login** (people who haven't replaced their temporary password yet).

Search and filters: search by name, username or research area. Use the **All / Active / Blocked / Admins** buttons to filter.

Each user's row has a dot on the photo: 🟢 means active, 🔴 means blocked. It also has these buttons:

Button	What it does
✏️ **Edit**	Change **full name**, **username**, **research area** and **bio**
🚫 **Block**	Asks for confirmation, then signs the person out and stops them signing in. Their papers stay. The row shows **Blocked**.
✅ **Unblock**	Shown instead of Block for blocked users. Restores sign-in.
🗑️ **Delete**	**Permanently** deletes the account, all their papers, PDFs and submissions. **This cannot be undone.**

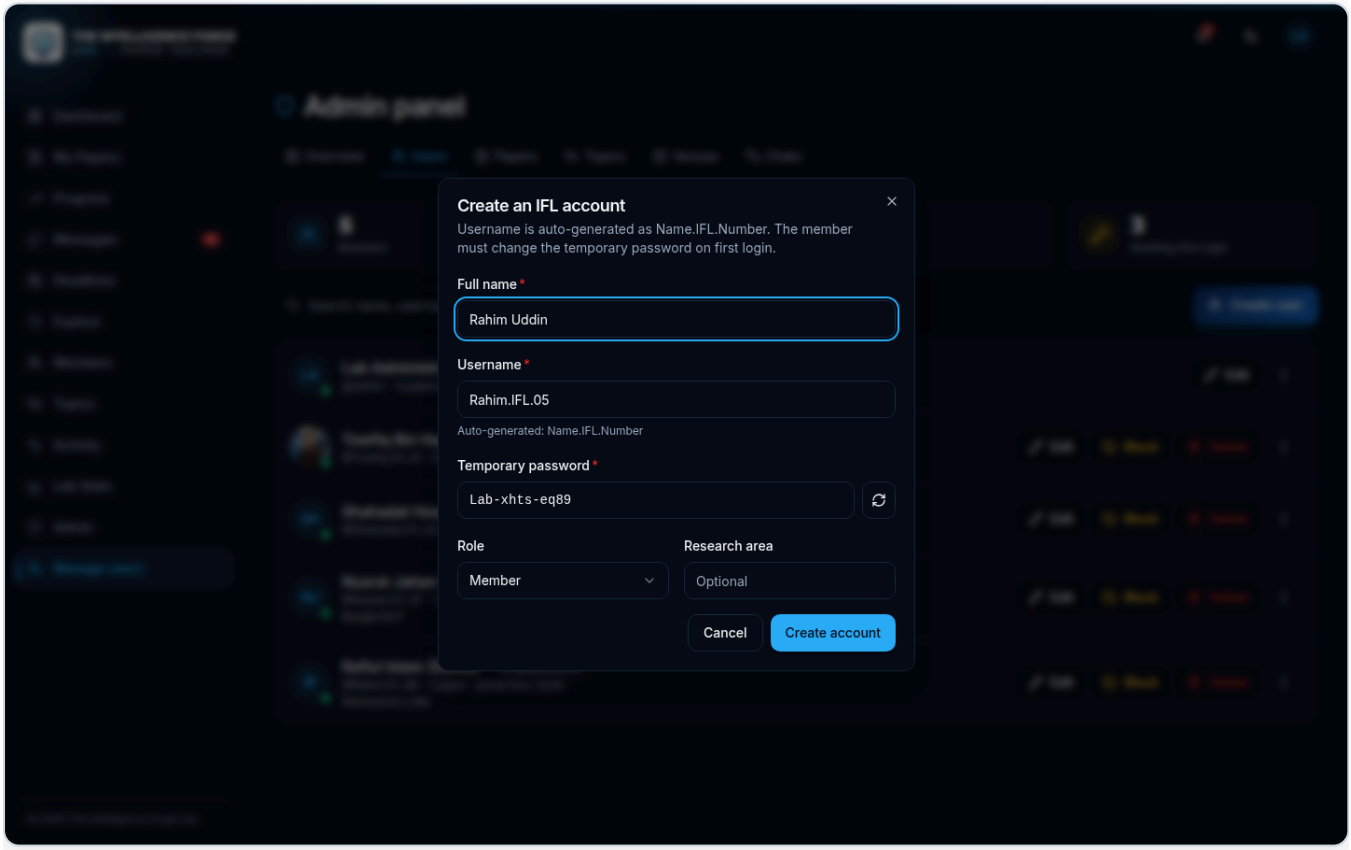

Button	What it does
⋮ More	**Reset password**, **Make admin** / **Make member**

Safety rules:

- You can't block or delete your own account.
- You can't block, delete or demote the **last** admin.
- If you might ever need the person's data again, **Block** instead of Delete.

> **Changing a username:** the person signs in with the **new** username from then on, and their password stays the same. Tell them about the change.

13.3 Create a user

Create user.

1. **Manage users** → **Create user**.
2. Type the **full name**. A username like `Rahim.IFL.04` is suggested, and you can change it.
3. Keep the generated **temporary password** or type one. It needs 8+ characters with letters and numbers.
4. Choose **Member** or **Admin**, and optionally a research area.
5. Click **Create account**. The username and password are shown **once**. Click **Copy** and send them to the person privately.

13.4 Password requests

When someone uses **Forgot password?**, the request shows under the 🔔 **bell** and at the top of **Manage users**.

- Click **Reset password**. A new temporary password is shown once. Send it to the person privately, and the request closes automatically.
- Click **Dismiss** to close a request without acting on it.

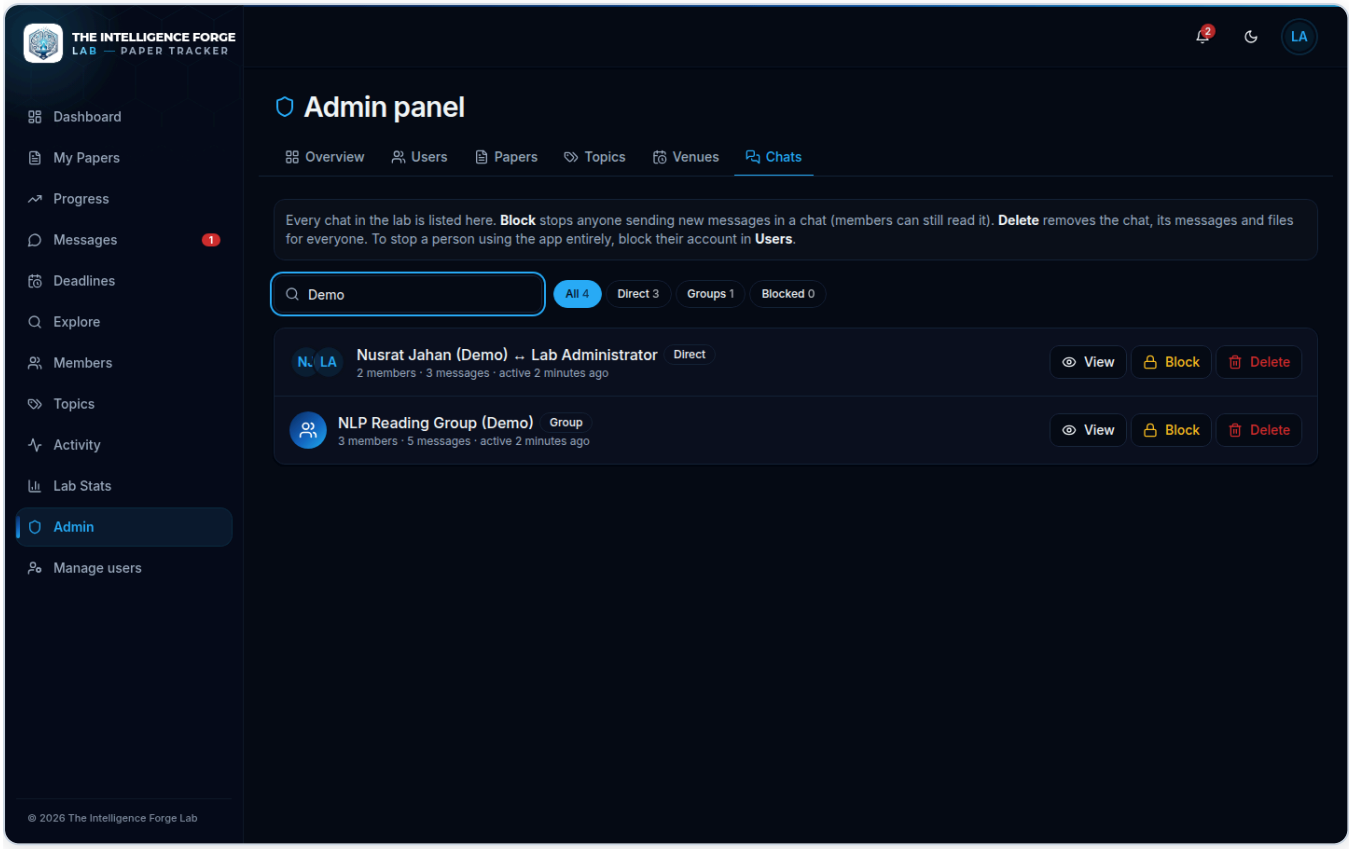

You can also reset anyone's password at any time from ⋮ → **Reset password**.

13.5 Other admin pages

Open **Admin** in the sidebar. The tabs along the top are:

Tab	Use
Overview	Lab statistics, and the switch **"Members can add conferences & journals"**
Users	Same as **Manage users**
Papers	Search every paper and delete duplicates or mistakes
Topics	Create, rename, recolour or delete topics. Deleting a topic only removes the tag; papers stay.
Venues	Add, edit or delete conferences and journals
Chats	Every chat in the lab: read, block and delete (see 13.6)

13.6 Moderating chats

Admin → Chats: View, Block and Delete for every chat.

Open **Admin → Chats**. Every direct chat and group in the lab is listed, with its members, the number of messages and the last activity. Use the search box and the **All / Direct / Groups / Blocked** filters to find one.

Button	What it does
👁 **View**	Opens the chat so you can read it. Hover a message and use ⋮ → **Delete** to remove it.
🔒 **Block**	Nobody can send new messages in that chat. Members can still read it and see that it is blocked.
🔓 **Unblock**	Allows messages again
🗑️ **Delete**	**Permanently** deletes the chat with all its messages and files, for everyone

You can do the same from inside any chat you are in, with the ⋮ menu at the top right.

> **Blocking a chat vs. blocking a person:** blocking a chat only stops messages in that chat. To stop someone using the app entirely, block their account in **Manage users** (13.2). A blocked account can't send messages anywhere.

14. Common questions

My charts say "No data yet". You haven't logged a paper yet. Log one, set **Status = Completed** and fill in **Date read**.

My streak is 0. The streak counts days in a row that have a paper with that **Date read**. It must include today or yesterday, and a day with no paper resets it.

I can't edit someone else's paper. That's expected. Only the person who logged a paper can edit it.

A topic I need doesn't exist. In the paper form, type the topic name in **Research topics** and press **Enter**.

My PDF won't upload. Only PDF files up to **50 MB** are accepted.

I was signed out and can't sign in. Your account may be blocked, or your password was reset. Contact your lab admin.

Messages doesn't appear in my sidebar. Chat hasn't been set up yet. Ask your admin to run the latest database update.

I can't send messages in a chat. An admin has blocked that chat (you'll see 🔒 **Blocked**), or you are no longer in the group.

My file won't send. Files must be under 25 MB and be an image, PDF, Office document, text/CSV or ZIP.

I don't get desktop notifications. Turn them on from the 🔔 bell, and keep the Paper Tracker open in a tab. Check that the browser and your computer's "Do not disturb" mode allow notifications.

Who can see my papers and notes? Everyone in the lab who is signed in. Nothing is public on the internet.

Can't find an answer? Ask your lab admin.
